CALLY CANCELLY CARLEY

Clamping the little design of the land of

#### HORTICULTURAL HELP

We want to become acquainted with all who own, or expect to own, a lawn or garden. We want to extend to all our friends, customers and prospective friends the service of our

## Special Information Department

This is a distinct and separate department in our large business, which looks after the interests of all who come to us after horticultural advice.

Feel perfectly free to write to us about your garden perplexities—and as often as you may wish.

You may want to know-

What are the best street trees?
What trees do well in a damp position?
What effective remedies there are for scale?
The identity of a certain tree or shrub?
What is the best hedge?

These and thousands of other questions come up continually and it is just at these times we want you to feel free to write to us.

You can readily understand the unique position we occupy. In a business career covering fifty-three years of practical as well as personal experience, we have been able to store away much valuable information. We offer this to you, wishing to deserve your friendship and patronage.

If you are starting out with a new property or intend renovating an old one, would you like to have some valuable advice as to a means of securing the very best effects at a saving of time and expense?

To many, this plan of soliciting inquiries may seem a foolish policy, but we want to make friends and deserve the confidence of all who come to us.

Let us hear from you. We are always busy, but never too busy to help you and give you our advice on your garden problems.

THOMAS MEEHAN & SONS, INC.

OULD you be inclined to associate this modest looking office with one of the largest horticultural establishments in the world? That is just what it is, however, and the establishing, growth and success of the business reflect great credit on its founder.

Fifty-three years ago Thomas Meehan started the nurseries with but a few acres of ground. His keen knowledge of plant life proved valuable and gave him a high standing, even at that early period.

As the years rolled on and the business increased, new methods were introduced, and additional facilities added, which gave the firm greater prestige.

The most rapid advancement has, however, been within the past ten years.

Where at one time a few plants were grown, now one variety may be seen by the thousands.

The 280 acres now owned and fully planted with hardy plants of all kinds, represent one of the greatest collections to be seen anywhere.

Since the inception of the business, certain methods have been religiously followed, and principal among these are care and attention to the stock, while growing.

From the time the plants sprout from the seed, or are propagated, they are cultivated, trained, pruned or sheared, as the case may be, each being given special, individual attention. We believe, too, in frequent transplantings and this, in a large measure, is the reason our plants look so vigorous. You can see the difference in appearance at once, if you are familiar with ordinary, nursery-grown plants.

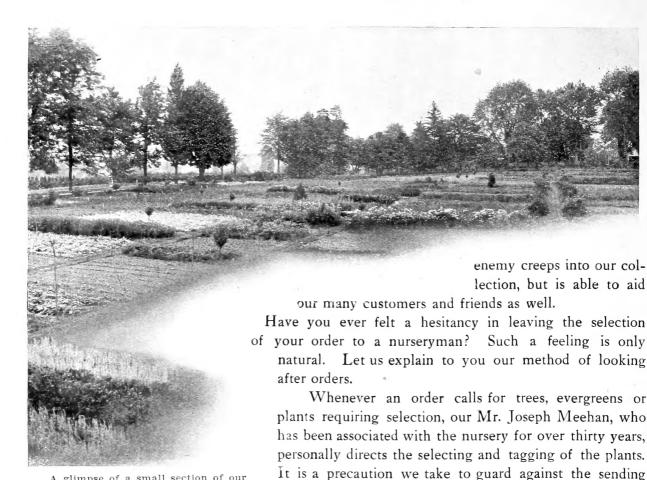

Ordinary precautions do not satisfy us. Most nurseries are content to have the State inspector visit their grounds once a year; and some would prefer that he came not at all. We have not only a thorough State inspection of our great plantings of hardy ornamentals each season, but others at frequent periods. Even this is not enough. We have, by training, developed an expert who makes a specialty of plant pests, diseases and afflictions great and small. With his large staff of trained assistants, he is not only able to keep watch that no

Plants personally selected

-and dug by hand

The "Meehan" method of packing

As to price

When an order is to be dug, our careful methods again appear. A foreman digger oversees the digging and labelling, seeing that there is no defect in root or branch. The digging, too, is not accomplished by a mechanical "tree digger," which mutilates the roots, but each plant is separately dug with a spade.

of a plant not suited to our customer's needs.

Evergreens are most carefully moved, each plant being dug with as much earth around the roots as it is possible to get. All roots are carefully wrapped in burlap and shipped or delivered in this condition. It can readily be seen that with this way of treating plants the risk is reduced to a minimum.

Our packing, by experience gained in the years we have been in business, is overseen by Mr. Edward Meehan, and his association with this particular branch of the work admirably fits him for the position. Our shipments of plants to Australia and New Zealand reach our customers there, in such excellent condition, as to be a pleasant surprise to them. Little wonder, then, that we feel so confident of satisfactorily serving any person in the United States.

We price our stock at its actual value. Our head salesman yearly makes a tour of our nurseries, viewing every class of plants and pricing it right on the ground. By this means, a just and fair price is set. Though given more than the usual care and comparing more than favorably with the "ordinary" grown plants, our prices stand comparison with even those of the cheaply grown plants.

Why go to all this care and trouble? What results are secured? The purchaser gets full value for all he buys and, instead of having to replace entire plantings, the stock takes hold of the soil and produces results. He therefore gains two-fold—results are quickly secured, a valuable saving of time; and no second expense is incurred.

In our business, dealing as we do in perishable goods, it is an impossibility

Regarding guarantees

Our staking method applied to a block of young Oak trees. We are recognized as the pioneers in the introduction of the Oak as an ornamental tree.

to have every plant we sell, live. There are conditions over which we have no control that have a great bearing on a plant's existence. This is clearly shown at times, on our own nursery, when we lose many plants, though, as may well be imagined, every effort is made to save them.

We speak of this to show how impossible and unjust to ourselves it would be to guarantee plants to live. Occasionally, we learn of nurserymen who do, but it will always be found that he more than covers the risk run, by charging an additional price.

In a large business, of the extent of ours, we naturally have some complaints. Usually they arise from the conditions cited above. In treating all of these, our Mr. S. Mendelson Meehan takes a personal interest, seeing that the customer's claim is given just consideration. We can assure all, that seldom is there a case that is not fully and most satisfactorily adjusted.

In presenting this 80-page catalogue to the plant lover, a few explanations may be of vital interest.

It has been our aim to make this catalogue clear and comprehensive to the amateur who is not acquainted with botanical names, and yet, at the same time, conform to the best authority on Latin names.

A brief but clear and truthful description of our plants is given. All the illustrations are from photographs, taken on our nursery or in the immediate neighborhood. Accuracy is therefore assured.

Priced according to size

The method of pricing each size originated with us and is the only truthful way of offering plants. You know exactly what you are buying.

We want your patronage, but only after you have assured yourself of the sincerity of our statements and the desirability of our plants.

No question is too unimportant for us to answer—your interest in hardy plants of any kind will make correspondence a pleasure.

All questions answered

Thomas Melhan four Inc.

J. FRANKLIN MEEHAN
Manager of Landscape Department
VICE-PRESIDENT

S. MENDELSON MEEHAN Manager of Nursery Sales Department SECRETARY AND TREASURER

THOMAS B. MEEHAN Manager of Wholesale Nurseries

Out of many large and expensive collections of hardy plants exhibited at the Louisiana Purchase Exposition, ours, which was really very small, received the separate distinction of the Gold Medal award. Such a valuable mark of quality cannot be rehased. The face and reverse side of the medal are shown.

Ac

# **Deciduous Trees**

Our collection of native and foreign deciduous trees will be found to be large and extensive, our desire being to secure all worthy trees of this class.

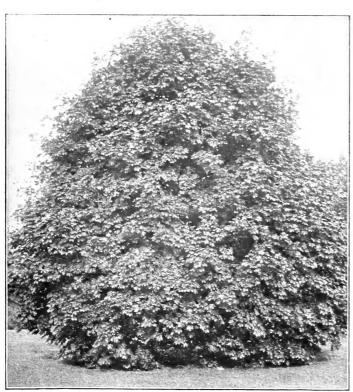

The methods we use in growing all our trees are unusual and not followed by the ordinary tree man, simply because the expense cuts down his margin of profit.

Frequent transplantings and cultivation at the proper period, result in vigorous rooted plants. We prune when the young trees need it, and when some trees do not naturally grow as straight as is desired, we stake them and correct this fault.

If you desire information concerning the best street trees, weeping trees, formal trees, flowering trees, low-branched trees or quick-growing kinds, we shall be glad to have you

We have solved the perplexing question, which always confronts our customers as to what and where to plant, by an arrangement with our Landscape Department to furnish plans and keys showing proper location of groups, beds and borders of trees, shrubs, evergreens and hardy plants.

These plans are simple in construction and can be executed by yourself or anyone of ordinary intelligence. The cost depends on the size and character of the effects desired and varies from \$5.00 to \$10.00.

As a specimen, the Purple Norway Maple, as can be seen, is highly suitable.

## Acer—The Maples

Acer dasycarpum. Silver or Soft Maple (50 to 60 ft.). A valuable, quick growing tree. Annual pruning develops it into a beautiful, large specimen. Spring planting is usually preferable.

|  | Each   | Per 10 | Per 100 |
|--|--------|--------|---------|
| 8 to 10 ft., 1 -11/4 in. diam.                         | \$1.00 | \$7.50 | \$50.00 |
| 10 to 12 ft., $1\frac{1}{4}$ - $1\frac{1}{2}$ in diam. | 1.50   | 12.50  | 100.00  |
| 12 to 14 ft., 1\%-2 in. diam.                          | 2.00   | 15.00  | 125.00  |

| 3 to 3½ in. diam                                       | 3.50   | 30.00  | 250.00  |
| Specimens, \$4.00 to \$8.00.                           |        |        |         |

A. var. Wierii. Cut-leaved Silver Maple (35 to 40 ft.). The attractive, finely cut foliage and graceful weeping habit of growth make this one of the handsomest lawn trees.

#### SPECIAL

The 10 rate given below may be used on every item of an assorted order of 25 trees; the 100 rate on every item of an assorted order for 100 or more. Where no quantity rate is quoted the single rate is the lowest price that can be made.

Five plants of any one variety and size at the 10 rate, or 25 of any one variety and size at the 100 rate.

Figures in parenthesis indicate about the height of the tree at 25 or 30 years of age. Diam. indicates diameter of the trunk of the tree at the base.

## Acer—The Maples

No finer trees exist for general lawn and shade purposes than the Maples. Fast growers, thriving in almost any soil, and perfectly hardy, they suit almost all conditions.

As street and avenue trees the Silver, Wier's Cut-leaved, Norway, Schwedleri, Sycamore and Sugar are highly suitable.

On the lawn the Wier's Cut-leaved, laetum, Norway and Sugar Maples do the best, especially for large growth, while the Globe Norway, low-branched Schwedleri and Ginnale are unsurpassed as beautiful, dense screens or bushes.

For convenience the Japanese Maples are separately grouped.

#### Japanese Maples

The beautiful, dwarf Japanese Maples, combining as they do so many attractive features, should be represented on every property, regardless of its size.

They lend themselves admirably to all forms of ornamentation.

The one so well known as the blood-leaved Japanese Maple is "polymorphum atropur-pureum." One very similar, but the leaves of which are finely-cut and which has a pendulous habit, is "dissectum atropurpureum." The pretty, cut-leaved green variety with the dainty weeping habit is "dissectum."

A decidedly good effect is secured by planting the various kinds in a bed, in this manner securing handsome foliage contrasts. For this purpose plants should approximately be planted three to four feet apart.

We grow every plant offered and can for this reason recommend them for vigor and hardiness.

Spring is the only time in which to transplant Japanese Maples unless they are in pots, in which case they can be safely moved at any

A. Japonicum (10 to 15 ft.). Broad, dark green foliage. Each Per 10 3 to 3½ ft., 6 in. pots..... \$2.00 \$18.50\$175.00

#### Æsculus—The Horse-chestnuts

The Horse-chestnuts develop into tall, noblelooking trees and are highly suitable for lawn or sidewalk planting.

In a moist situation they preserve their foliage for a longer period than usual.

Our stock of these trees is unusually fine, the roots being strong and vigorous. They will give an early effect if planted in good soil.

Æsculus glabra. American Horse-chestnut (50 to 60 ft.). Rapid grower and a highly suitable street tree. Greenish yellow flowers early in May.

Each Per 10 Per 100
10 to 12 ft., 2½ in. diam.... \$2.00 \$17.50 \$150.00

A. var. alba plena (40 to 50 ft.). A beautiful, double, white-flowered variety.

Each Per 10 Per 100 8 to 10 ft., 1½ to 2¼ in. diam \$2.00 \$17.50 \$125.00 12 to 14 ft., 2 to 2½ in. diam. 2.50 20.00 10 to 12 ft., 3½ to 4 in. diam. 5.00 45.00

A. rubicunda. Red-flowered Horse-chestnut (35 to 40 ft.). The red flowers are tinged with yellow. Good, dark green foliage.

The huge panicle of flowers makes the flowering Horsechestnut popular.

#### ·

Trees
Ai to Be

#### Ailanthus—Tree of Heaven

Ailanthus glandulosa. Seed-bearing Tree of Heaven. The flowers of this variety do not have any offensive odor.

Each Per 10 10 to 12 ft., 1½ to 2 in. diam...... \$1.50 \$12.50

#### Alnus-The Alders

Alnus glutinosa. European or Black Alder (30 to 35 ft.). A rapid growing tree for a moist situation,

Each Per 10 Per 100 10 to 12 ft., 1½ to 2 in. diam. \$1.25 \$10.00 \$80.00 12 to 14 ft., 2 to 2½ in. diam. 2.00 15.00 90.00

A. incana. Speckled Alder (30 to 40 ft.). Excellent for moist ground.

A. serrulata (10 to 12 ft.). A valuable form for moist situations.

## Amygdalus—The Flowering Peaches

Remarkably effective, double flowers appear in great profusion, early in spring, before the leaves. Plant in the spring, except in southern or protected places where fall planting may be undertaken. Prune severely.

What a sight the double blossoms of the flowering Peach make in early spring.

Amygdalus Persica (10 to 12 ft.). Double-flowered white and crimson Peaches.

#### Betula—The Birches

The beautiful bark of birches, some white, some salmon red or yellow, others black, together with their neat foliage and graceful growth, make them very valuable in creating various landscape effects.

They are indispensable for positions difficult to fill. The red thrives in moist places and on banks of streams; while all do equally as well on dry and stony hillsides. Birches should be transplanted in the spring and then as early as convenient.

Betula alba. European White Birch (35 to 40 ft.). Of rapid growth, attractive foliage and beautiful silvery-white bark. Droops just a little.

Per 10 Per 100 Each \$50.00 4 to 6 ft., ¾ to 1 in. diam.... \$ .75 \$6.00 1.25 10.0075.00 6 to 8 ft., 1 to 1½ in. diam... 100.00 8 to 10 ft., 1½ to 2 in. diam... 1.50 13.50 10 to 12 ft., 2 to 21/4 in. diam. 2.5020.00150.00

B. var. purpurea. Purple Birch (30 to 35 ft.). Quite a distinct kind, having purple foliage and purplish-white bark.

## Castanea—The Chestnuts

Highly ornamental, and valuable too for their edible nuts.

Plant in spring and prune to secure satisfactory results.

Castanea Americana. American Sweet Chestnut (50 to 60 ft.).

Per 10 Per 100 Each 6 to 8 ft., 1 in. diam..... \$1.50 \$12.50

C. vesca. Spanish Chestnut (30 to 35 ft.). Nuts of very large size. Beautiful foliage.

Each 

C. var. "Paragon." Improved form, with very large, sweet chestnuts. Fruits when young.

Each 4 to 5 ft...... \$1.50

#### Catalpa

These are grand trees for either ornamental

use or shade and street purposes.

The large, broad, handsome foliage looks well at all times and in late June the panicles of pure white flowers present a sight worth seeing.

The speciosa is one of the best for shade purposes, making a well-formed tree.

Catalpa bignonioides. Catalpa (30 to 35 ft.). Rapid grower and spreading habit of growth. Blooms in late June. Each Per 10 Per 100 8 to 10 ft...... \$1.50 \$10.00

C. var. aurea. Golden-leaved Catalpa (25 to 30 ft.). The green leaves of the above are shaded with yellow. Very ornamental.

Each \$12.50 6 to 8 ft......\$1.50 20.00

C. Bungei. Standard) Globe-headed Catalpa (6 to 8 ft.). A great demand exists for this form, and it has many ornamental merits.

Each Per 10 Per 100 5 to 6 ft. stems, 15x18 in. heads \$2.00 \$17.50 \$150.00 4 to 6 ft., 4½ ft. stems, 3 yr. heads 2.50 20.00 8 to 10 ft., 5 ft. stems, 6 yr. heads,  $2\frac{1}{2}$  to 3 in. diam..... 8.00 50.00

C. var. nana. Dwarf Catalpa (4 to 5 ft.). Pretty dwarf globe bushes useful for formal, ornamental purposes. 5 to 6 ft., bushy...... \$1.50 \$12.50

You can easily see the point we make; that Catalpa speciosa is a fine tree.

C. speciosa. Western Catalpa (35 to 40 ft.). The best for street and lawn planting. Beautiful, large foliage and in June a grand display of white flowers. Especially fine are our large, well-developed specimens.

Each Per 10 1 to 1½ in. diam. (8 to 10 ft.). \$ .75 \$5.00 \$45.00 10 to 12 ft., 1½ to 2 in. diam. 1.50 12 to 14 ft., 2 to 2½ in. diam. 2.00 12.50 100.00 15.00 125.00 3 to 3½ in. diam..... 3.00 25.00

#### Cedrela

Thoroughly satisfactory trees for general purposes are scarce and when the rare Chinese Cedrela came to our attention we saw its many excellent features and determined to grow it.

Beautiful feathery foliage and graceful habit of growth give it a tropical effect similar to the

Ce to Fa

Ailanthus, yet not having the offensive odor of the latter.

Very quick growth makes it excellent for street or avenue planting. It is not short-lived like the Poplar, but develops into a magnificent specimen and is the easiest tree we know of to move.

Long, pendulous racemes of white flowers

also add to its many sterling qualities.

It is going to be very popular and you should profit by our suggestion and secure it now. It is sure to please you.

The Cedrela foliage has a real tropical appearance and notice the pretty racemes of flowers.

| Chinese   | Cedre             | la (50                                    | ft.).      |

| 6 | to | 8 | ft | 2.00   | 15.00   | 125.00   |

#### Larix—The Larches

The early appearance of the bright green shoots and its beautiful soft foliage make the Larch an unusually pretty and ornamental tree.

To secure the best results it should be planted in fall or in very early spring just as soon as the frost is out, and pruned severely.

| Larix | Ame: | ricana. | Ame    | rican | Larch     | (50 ft.). |

## Liquidambar—Sweet Gum

Liquidambar styraciflua. Sweet Gum (40 to 50 ft.). The beautiful star-shaped leaves are lustrous and in the fall change to bright crimson shades. Does well in moist situations. Always plant in the spring. Our stock of these trees is unusually fine, the plants being well developed.

Each Per 10 Per 100 6 to 8 ft., ¾ to 1¼ in. diam... \$1.00 \$7.50 \$50.00 8 to 10 ft., 1¼ to 1½ in. diam. 1.50 12.50 100.00 8 to 10 ft., 1½ to 2 in. diam... 2.00 15.00 125.00

## Liriodendron—Tulip Tree

Liriodendron tulipifera. Tulip Tree (50 to 60 ft.). A tall, shapely tree, gaining very large proportions. Bears large tulip-like flowers. Does well in a moist situation. Always plant in the spring and prune very closely.

Each Per 10 Per 100 6 to 8 ft., ¾ to 1¼ in. diam... \$1.00 \$7.50 \$50.00 8 to 10 ft., 1¼ to 1½ in. diam. 1.50 12.50 100.00

## Magnolias

It would be hard to find a finer group of flowering trees than the Magnolias.

Their beautiful foliage and shapely habit of growth, combined with world-famed blossoms, make them indispensable for ornamental planting.

Never have we had a finer stock of plants of the beautiful, dwarf pink-flowered one, "stellata" or the Chinese sweet-scented white "contribute"

They are unusually large, yet perfectly safe to move, having been frequently transplanted.

Spring planting is the only safe course unless plants can be had in pots or tubs, as we offer in some cases.

List of varieties on next page.

### Quercus—The Oaks

These grand native trees are unquestionably the most valuable for practical as well as for ornamental purposes.

At one time the erroneous idea existed that the growth was very slow, but now thousands

are annually planted and enjoyed.

Under very favorable conditions and with proper care in planting, fall moving of Oaks may be attended with success, but for general purposes and especially in the case of exposed situations, spring planting is preferable.

#### Quercus Banisteri. Scrub Oak.

Each **Per 10 Per 10**0 18 to 24 in. ..... \$ .35 \$2.00

Q. bicolor.. Swamp White Oak (40 to 50 ft.). A fine well-formed Oak with attractive foliage, and develops into a handsome specimen. Excellent for a wet or a dry situation.

#### Salisburia—Maidenhair or Ginkgo

Salisburia adiantifolia (30 to 40 ft.). The oddly shaped foliage resembling the Maidenhair Fern gives it its name. It makes a beautiful columnar tree, highly valuable in landscape work. The glossy foliage is proof against insect attacks. When pruned it develops into a good tree for street planting.

Each Per 10 Per 100 \$6.00 .... \$ .75 8 to 10 ft., 1 to 11/4 in. diam. 1.50 13.50\$125.00

S. adiantifolia. Fruiting form. Each Per 10 \$17.50 10 to 12 ft.,  $1\frac{1}{2}$  to 2 in. diam....... 12 to 14 ft., 2 to  $2\frac{1}{2}$  in. diam.......

#### Salix—The Willows

Graceful and with beautiful foliage of various forms the Willows prove effective on almost every property.

Not only attractive during the growing season, but in winter when the golden and bright

red barks of some make a striking effect.
Though Willows do well in moist ground, it is not essential, as they thrive in dry ground. All our plants are above the usual grade and we can unhesitatingly recommend them.

Spring is the best time to plant, pruning

severely to get the best results.

Salix alba. White Willow (25 to 30 ft.). Each Per 10 Per 100 4 to 5 ft..... \$ .75 \$6.00 \$50.00

S. aurea pendula. Golden Weeping Willow (30 to 35 ft.). Pretty golden bark and handsome weeping habit. Each Per 10 Per 100

\$6.00 \$50.00 20.00

S. Babylonica. Weeping Willow (35 to 40 ft.). This will always be a favorite tree, due to its beautiful, weeping growth.

S. var. annularis. Ring-leaved Willow (30 to 35 ft.). A form with curiously curled leaves.

Each Per 10 Per 100 \$6.00 \$50.00 4 to 6 ft..... \$ .75 

them in sight, in the early Spring. The Pussy to have

- S. caprea. Pussy or Goat Willow (10 to 12 ft.). How attractive in early spring are the blossoms of this willow and later the foliage makes a handsome show. We never had a finer lot of trees, and very good effects can be had from them at once, they are so bushy Each Per 10 Per 100 and stocky. \$7.50
- 5 to 6 ft......\$1.00 6 to 8 ft, ...... 1.50 10.00 80.00
- S. Japonica (25 to 30 ft.). Leaves more deeply toothed than Babylonica, otherwise much like it. Each Per 10 Per 100 5 to 6 ft., bushy..... \$ .75 \$6.00
- S. pentandra. Laurel-leaved Willow (20 to 25 ft.). Handsome dark green, glossy foliage that is striking in appearance. Thrives in low, moist ground and at the seashore. It is a grand form and should be used a great deal more.

Each Per 10 Per 100 \$3.50 to 5 ft..... 6.00 50.008 to 10 ft., bushy................. 2.00

S. rosmarinifolia. Rosemary Willow (6 to 8 ft.). Pretty, fine, light green foliage, on slender twigs. Each Per 10

3 to 4 ft. \$ .50 5 to 6 ft. \$ .100

S. Russeliana (30 to 40 ft.). Upright growth with heavier foliage than the common Weeping Willow. Each Per 10 Per 100

\$6.00

S. Russian Golden (30 to 35 ft.). Bright golden bark and upright habit of growth make this an attractive tree. Very hardy.

Each 8 to 10 ft......\$1.50 \$12.50

S. Sieboldiana. Similar to the Willow known as Thurlow's Weeping. 6 to 8 ft..... \$ .75

S. vitellina. Golden Willow (30 to 35 ft.). Highly effective in winter with its golden bark. Severe pruning encourages a vigorous growth of new shoots.

Each Per 10 Per 100 \$6.00 \$50.00 15.00 100.00

S. var. Britzensis. Flame or Bronze-barked Willow (20 to 25 ft.). Like the former, its winter effect is gorgeous, the bright red twigs in contrast with the snow. Prune as recommended above. Each Per 10 Per 100

\$3.50 \$30.00 50.00 6.00 8 to 10 ft.....

## Sophora—Pagoda Tree

Sophora Japonica. Chinese Pagoda Tree (30 to 40 ft.). The panicles of yellowish white flowers are handsome and appear in early August. Pretty green foliage and compact-Each Per 10 Per 100 growing tree. 18 to 24 in..... \$ .35 3 to 4 ft..... 75 \$2.50\$20.00 5.00 35.00

# **Deciduous Shrubs**

The collection of shrubs to be found in this manual does not begin to represent the great amount of labor and time that has been spent to compile it. Ever since the nursery was started, fifty-three years ago, the work of acquiring and eliminating has been constantly going on. All new and worthy plants have been added, and those proving undesirable discarded. As

The 10 rate given below may be used on every item of an assorted order for 25 shrubs; the 100 rate on every item of an assorted order for 100 or more. Where no quantity rate is quoted the single rate is the lowest price that can be made. Five plants of any one variety and size at the 10 rate, or 25 of any one variety and size at the figures in parenthesis indicate about the height of the plant at maturity. SPECIAL

#### **Abelia**

Abelia rupestris (Chinensis) (5 to 6 ft.). The glossy leaves of this shrub are very pretty and its white flowers, tinged pink, add to its beauty. Each Per 10 Per 100 6 to 9 in..... \$ .35 \$2.50 \$20.00

#### Amelanchier—Service Berries

Amelanchier Botryapium. Service or June Berry (20 to 30 ft.). Pure white flowers appear in April and are followed by edible, purple berries. Each Per 10 Per 100

## Amygdalus—Flowering Almond

Amygdalus nana. Double Pink (4 to 6 ft.). The small, pretty double flowers come before the leaves in May. Each Per 10 Per 100 \$25.00 2 to 3 ft..... \$3.00 \$ .35 A. nana. Double White. The same as the above, but white. Each Per 10 Per 100 3 to 4 ft..... \$ .50

## **Azaleas**

Everyone admires the Azalea, but as a hardy plant it is often forgotten. It is valuable in garden work. The half shaded spot in which it thrives is made bright with its beautiful, fragrant flowers.

Increased beauty is given the Rhododendron bed if Azaleas are used on the margin-especially the "mollis" and "calendulacea." In wild natural plantings, "nudiflora" is at The Ghent furnishes home. many colored varieties, all of which are attractive.

Unless in pots, the best time to plant is spring; fall planting usually resulting in plants being more or less winterkilled.

One of our ordinary stock plants of the Standard Azalea in flower.

Az to Ca

A. var. Standards. A novel form of Azalea. Well developed heads, which when in flower are a huge bouquet of bloom. They lend themselves to formal planting.

Each Per 10 Per 100 3 to 4 ft., 18 to 24 in. stems \$2.50 \$25.00 \$200.00 A. Pontica. Ghent Azalea (5 to 6 ft.). Excellent for planting in company with Rhododendrons. They can be had in various colors, making possible many attractive effects. All ours are named varieties. Each Per 10

#### Baccharis—Groundsel Shrub

Baccharis halimifolia (6 to 8 ft.). The flowers are not as showy on this plant as its clusters of white, downy seed appendages, which appear in late summer.

The large, glossy foliage of Berberis Sieboldi, is indeed handsome.

## Berberis—Barberry

Many beautiful effects are obtainable with the Barberries and their hardy nature recommends them for all purposes.

The foliage is very effective, especially in the fall, when it changes to such glorious colorings.

The Japanese variety is unquestionably the finest dwarf shrub for hedging. See ornamental hedges.

Berberis ilicifolia. Holly-leaved Barberry (6 to 8 ft.). Shiny, dark green foliage.

|             |        | Per 10 |
|-------------|--------|--------|
| 18 to 24 in | \$ .50 | \$3.50 |
| 4 to 5 ft   | 1.00   | 7.50   |

B. Sieboldii (4 to 6 ft.). Resembles our native Barberry, but foliage and berries are larger.

B. Thunbergii. Japanese Barberry (3 to 4 ft.). What a grand shrub this is for ornamental purposes. Bushy, but neat in growth and with gorgeous autumn coloring to the foliage. The bright red berries remain on during the winter.

|             | Each   | ${ m Per}10$ | Per 100 |
|-------------|--------|--------------|---------|
| 12 to 18 in | \$ .25 | \$2.00.      | \$15.00 |
| 18 to 24 in | .30    | 2.50         | 18.00   |
| 2 to 3 ft   | .50    | 3.50         | 30.00   |

B. vulgaris. Common Barberry (5 to 6 ft.). Hardy and well adapted for hedging purposes and shrubbery borders. It bears quantities of berries which turn to a purplish-red in the fall and remain on all winter.

|             | Each   | Per 10 | Per 100 |
|-------------|--------|--------|---------|
| 18 to 24 in | \$ .25 | \$2.00 | \$15.00 |
| 3 to 4 ft   | .50    | 3.50   | 25.00   |

B. var. purpurea. Purple Barberry (4 to 5 ft.). Effective for color display among shrubs or as an individual specimen.

|             | $\mathbf{Each}$ | Per 10 | Per 100 |
|-------------|-----------------|--------|---------|
| 12 to 18 in | \$ .25          | \$2.00 | \$15.00 |
| 2 to 3 ft   | .50             | 3.00   | 25.00   |

#### Buddleia

Buddleia variabilis. Sweet-scented Buddleia (3 to 4 ft.). The orange yellow flowers appear in August and are quite fragrant.

|             | Each   | Per 10 |
|-------------|--------|--------|
| 18 to 24 in | \$ .35 | \$2.50 |
| 3 to 4 ft.  |        | •      |

#### Callicarpa

Callicarpa purpurea (2 to 3 ft.). A Chinese shrub, valuable for its branches of violet-mauve berries in late autumn.

|                   | Each   | Per 10 | Per 100 |
|-------------------|--------|--------|---------|
| 18 to 24 in       | \$ .35 | \$2.50 | \$20.00 |
| 2 to 3 ft         | .50    | 3.50   |         |
| 3 to 4 ft., bushy | .75    | 5.00   | 50.00   |

# Calycanthus-Sweet Shrub

Calycanthus laevigatus (5 to 6 ft.). Commonly sold for the well known Sweet Shrub, but flowers not quite as fragrant. Very vigorous in growth.

|   |    | _ |    | Each   | Per 10 | Per 100 |
|---|----|---|----|--------|--------|---------|
| 2 | to | 3 | ft | \$ .50 | \$3.50 | \$30.00 |
| 3 | to | 4 | ft | .75    | 5.00   | 40.00   |

C. occidentalis. Western Sweet Shrub (6 to 10 ft.). More vigorous than the others in growth. Flowers similar to the others, but come a little later.

Each Per 10 \$ .25 \$2.00

Ca to Co

## Caragana—Siberian Pea

Caragana arborescens (8 to 10 ft.). Resembles the well known laburnum, bearing clustered yellow, pea-shaped flowers. Extremely hardy.

|             | Each   | Per 10 | Per 100 |
|-------------|--------|--------|---------|
| 18 to 24 in | \$ .35 | \$2.50 | \$20.00 |
| 2 to 3 ft   | .50    | 3.50   | 30.00   |

C. var. pendula. Weeping Caragana. A charming little weeping form of the other. It is uncommon and will be a great favorite when better known.

|                               | Each   | Per 10  | Per 100  |
|-------------------------------|--------|---------|----------|
| 2 to 3 ft. stems, 3 yr. heads | \$2.00 | \$17.50 | \$150.00 |
| 3 ft. stems, 4 yr. heads      | 2.50   | 20.00   | 150.00   |

## Caryopteris-Verbena Shrub

Caryopteris Mastacanthus (Blue Spiraea) (2 to 3 ft.). A very handsome shrub, bearing clusters of blue flowers in September. Not hardy north of Philadelphia, without protection.

|                          | Each   | Per 10 | Per 100 |
|--------------------------|--------|--------|---------|
| 18 to 24 in., 7 in. pots | \$ .50 | \$3.50 | \$25.00 |
| 3 to 4 ft., bushy        | .75    | 5.00   |         |

## Ceanothus-New Jersey Tea

Ceanothus Americanus (3 to 4 ft.). The clusters of white flowers in mid-summer make this a grand shrub for interspersing in the border.

|             | Each   | Per 10 | Per 100 |
|-------------|--------|--------|---------|
| 18 to 24 in | \$ .35 | \$3.00 | \$25.00 |
| 2 to 3 ft   | .50    | 3.50   | 30.00   |

## Cephalanthus—Buttonball Shrub

One of our field-grown Judas Shrubs. They will give quick returns.

#### Cercis—Judas

Cercis Japonica. Japanese Judas (6 to 8 ft.). The deep pink blossoms clothe the branches in bloom in May. Very effective in shrubbery planting.

| Cercis Japonica. | Each   | Per 10 | Per 100 |
|------------------|--------|--------|---------|
| 18 to 24 in      | \$ .35 | \$3.00 | \$25.00 |
| 2 to 3 ft        | .50    | 3.50   | 30.00   |
| 3 to 4 ft        |        | 6.00   | 50.00   |
| 4 to 5 ft        | 1.50   | 12.50  |         |

C. canadensis. (See Trees.)

## Chionanthus—White Fringe

Chionanthus Virginica (8 to 10 ft.). The loose, drooping panicles of white flowers are highly attractive and with the large, dark green foliage make this an unusually handsome plant. Plant in a moist position where possible.

|    |    |   |      | Each   | ${ m Per}~10$ | Per 100 |
|----|----|---|------|--------|---------------|---------|
| 18 | to | 2 | 4 in | \$ .35 |               |         |
| 2  | to | 3 | ft   | .50    | 4.00          | 35.00   |
| 3  | to | 4 | ft   | .75    | 6.00          |         |
| 4  | to | 5 | ft   | 1.00   | 8.00          | 75.00   |
| 5  | to | 6 | ft   | 1.50   |               |         |

### Clethra—Sweet Pepper Bush

## Colutea—Bladder Senna

Colutea arborescens (6 to 7 ft.). Orange-yellow, pea-shaped flowers in clusters. Curious bladder-like seed pods later.

|   |    |   |    | Each   | Per 10 | Per 100         |
|---|----|---|----|--------|--------|-----------------|
| 4 | to | 5 | ft | \$ .50 | \$3.50 | <b>\$30.0</b> 0 |

#### Comptonia—Sweet Fern

Comptonia asplenifolia (2 ft.). Pretty fern-like foliage. Each Per 10 18 to 24 in..... \$ .35 \$3.00

## Cornus—Dogwood

The flat heads of flowers, appearing during early and mid-summer, followed by the colored berries, make these shrubs highly ornamental and valuable.

Additionally attractive during the winter are the brightly-colored twigs of some, in contrast with the snow.

They can be effectively used in shrub borders. Will thrive as well in fairly moist situations.

The kinds that give attractive effects by their twigs in the winter are improved by frequent pruning.

 Cornus alba (stolonifera).
 Red Twigged Dogwood (4 to 5 ft.).
 Valued for its bright red twigs in winter.

 White flowers in early June.

## Cotoneaster—Rose Box

Cotoneaster Simonsi. Shining-leaved Rose Box (4 to 5 ft.). The lustrous green foliage of this plant is striking and its pleasing habit of growth is quite ornamental. The bright red berries are showy.

|   |    |   |    | Each   | Per 10 | Per 100 |
|---|----|---|----|--------|--------|---------|
| 3 | to | 4 | ft | \$ .75 | \$6.00 | \$50.00 |
| 4 | to | 5 | ft | 1.00   | 8.00   | 75.00   |

# Cratægus—Hawthorns

The great popularity of the Hawthorns is due to their many good qualities.

Large and handsome foliage, abundance of flowers, many sweet-scented and the display of bright berries late in the season render them extremely useful in planting schemes of all kinds.

They are highly valuable for hedging. See Ornamental Hedge Plants.

#### Deutzia

How dead the spring display of flowers would seem without the dainty Deutzias.

Covered with pretty, bell-shaped flowers they transform the landscape into a bower of blossoms.

The tall, strong growing varieties, especially "crenata," with its single and double forms, can be effectively used as single specimens, as they flower in such profusion.

Lemoinei is not as tall, but equally as good, especially for the shrubbery border. The bushy, dwarf form, gracilis, is too well known to need description.

By pruning in June or July a strong, thrifty growth can be had and the display for the next year increased.

Deutzia crenata. Double Pink (6 to 8 ft.). A handsome, tall-growing kind and when loaded down with its dainty double pink flowers produces a grand sight. Useful for planting in masses or as a specimen.

|      |   |      |           | Each   | Per 10    | Per 100 |

# Hibiscus—Althæa or Rose of Sharon

Well known to all, these handsome, late, summer blooming shrubs are highly decorative and particularly effective, coming when few shrubs are in flower.

When pruned in the winter they make a sturdy growth and flower profusely the next fall. As a hedge plant, they are extremely valuable. See Ornamental Hedges.

We have a collection of the best varieties, among them being our new, single flowered, variegated leaved kind, H. Meehani.

Hydrangea

Too much praise cannot be given to so fine a collection of hardy shrubs as we have in the glorious Hydrangeas. Beautiful foliage at all periods, vigorous growing plants and when in flower, eclipsing all the other shrubs in size and quantity of blooms.

The popular fall-flowering variety with its huge panicles is well known to all. Preceding this in flower are the two forms of paniculata. A very worthy form is radiata, which flowers in July.

All these forms, when closely pruned in the winter or spring, make an unusually vigorous growth and flower more profusely.

H. paniculata (5 to 6 ft.). More upright in habit than the common variety and very effective on this account. It flowers at the same time as the common grandiflora.

|   |    |   |    | Each   | Per 10 | Per 100 |
|---|----|---|----|--------|--------|---------|
| 3 | to | 4 | ft | \$ .50 | \$3.50 | \$30.00 |

H. var. grandiflora. Standard. One of the prettiest of formal shrubs. When the bushy heads are full of bloom, they have a pendulous habit that is very effective.

Each Per 10 Per 100 3 to 4 ft...... \$ .75 \$6.00 \$50.00

H. quercifolia (3 to 4 ft.). Not only does this bear pretty sterile heads of flowers, but the foliage is deeply lobed, similar in form to the Oak and on this account very attractive.

Each Per 10 Per 100 Per 101 Per 100 Pe

H. radiata (3 to 4 ft.). Silver-leaved Hydrangea. This is a grand Hydrangea.

Each Per 10 Per 100 2 to 3 ft., bushy...... \$ .75 \$6.00 \$50.00 3 to 4 ft., bushy...... 1.00

#### Japanese Hydrangeas

The Japanese flat-headed flowered forms are worthy of special notice, being so distinctly different from all the others. Foliage glossy bright green and the flowers borne in flat heads with sterile flowers on the margin of the cluster and fertile flowers in the centre.

They usually require a little protection in the winter, but are well worth this additional attention. The system of pruning is different, severe winter pruning being avoided.

H. Hortensia Japonica. Japanese Hydrangeas (2 to 3 ft.). The grand flat heads of blue, pink and white flowers are highly ornamental, and in addition the bright green, glossy foliage.

Each Per 10 Per 100
12 to 18 in. \$ .50 \$4.00 \$35.00
18 to 24 in. 1.00 7.50 50.00

H. var. Japonica Imperatrice Eugenie (2 to 3 ft.). The flat heads of bloom on this variety have sterile flowers of a pleasing shade of pink around the margin of the flower head. The centre is fertile flowers.

H. var. Otaksa (2 to 3 ft.). Known by its huge heads of flower, pink or blue as the individual case may be. Their color is not constant.

Each Per 10 12 to 18 in., 6 in. pots...... \$1.00 \$8.00

H. var Thomas Hogg (2 to 3 ft.). The large globose heads of white flowers completely cover this plant, when it is in bloom.

Each Per 10 Per 100 \$12 to 18 in., bushy, 8 in. pots \$1.00 \$8.00 \$75.00

## Hypericum—St. John's Worts

Hypericum aureum (2 to 3 ft.). Very showy, the yellow flowers 2 inches in diameter.

H. Moserianum (2 to 3 ft.). The dark, rich green foliage and handsome, large yellow flowers make this invaluable. Not hardy in far north.

Each Per 10 12 to 18 in. \$.35 \$2.50

H. prolificum (2 to 3 ft.). More shrubby in growth and bears clusters of flowers in pro-

#### Itea—Virginian Willow

Itea Virginica (4 to 5 ft.). The rich, crimson, fall coloring, following the white flowers, which are in racemes in June, all add to the beauty of this native shrub.

#### Kerria—Globe Flower

Kerria Japonica fl. pl. (Corchorus) (3 to 4 ft.). Known to all by their attractive, double yellow flowers. They are invaluable for planting among other shrubs.

#### Ligustrum—Privet

The dark green, rich foliage of the Privets make them highly valuable to use for foliage effects with shrubs or as individual specimens.

The Californian variety is more commonly known through its use for hedging. The Ibota Privet can be depended on for hardiness. Re-

#### Li to Lo

Ligustrum—Continued gelianum is uncommon and for a specimen or

used among shrubs it lends itself admirably, having a pendulous growing style that is beautiful. It is just as hardy as Ibota.

All the Privets when pruned, develop quickly into handsome specimens. See Ornamental Hedges.

## Lindera-Spice Wood

Lindera Benzoin (Laurus). Spice Wood (8 to 10 ft.). The small yellow flowers come early in spring. Valuable for massing and thrives in moist and shady places.

|   |    |   |    | Each   | Per 10 | Per 100 |
|---|----|---|----|--------|--------|---------|
| 2 | to | 3 | ft | \$ .35 | \$3.00 | \$25.00 |
| 3 | to | 4 | ft | .50    | 3.50   | 30.00   |

After the sweet flowers of the push honeysuckle, come these attractive berries.

## Lonicera—Bush Honeysuckles

There is a wide range of variety in these beautiful, sweet-scented shrubs with their highly colored berries.

If more commonly used in shrubbery borders decidedly pretty effects would be possible.

Lonicera Bella candida. (4 to 5 ft.). Pretty white flowers followed by bright red berries.

|             | Each   | Per 10 | Per 100 |
|-------------|--------|--------|---------|
| 12 to 18 in | \$ .25 | \$1.50 | \$10.00 |

L. chrysantha (4 to 5 ft.). An unusual yellow, sweet-scented early flowered species.

|   |      |     | <br> |      | <br>Each   |
|---|------|-----|------|------|------------|
| 3 | to 4 | ft. | <br> | <br> | <br>\$ .35 |

L. fragrantissima (5 to 6 ft.). Fragrant Honeysuckle. The pretty white flowers tinged with pink, are deliciously fragrant. Later the scarlet berries follow.

|   |    |   |    | Each   | Per 10 | Per 100 |
|---|----|---|----|--------|--------|---------|
| 2 | to | 3 | ft | \$ .35 | \$3.00 | \$25.00 |
| 3 | to | 4 | ft | .50    | 3.50   | 30.00   |

L. Morrowi (6 to 8 ft.). The yellow-white flowers come in the spring, followed by deep red berries. A fine bushy form.

|   |    |   |    | Each   | Per 10 | Per 100 |
|---|----|---|----|--------|--------|---------|
| 3 | to | 4 | ft | \$ .50 | \$3.50 | \$25.00 |

L. orientalis (6 to 7 ft.). This type has black berries, which follow the pink flowers. Very attractive foliage.

| 3 to 4 ft., bushy   | .75    | 5.00   | 35.00   |

P. melanocarpa (4 to 5 ft.). This form differs from arbutifolia in having black berries.

## Rhamnus—Buckthorn

Rhamnus cathartica. Common Buckthorn (8 to 10 ft.). The well known hedge plant, valued for its extreme hardiness.

|      |   |    | Each   | Per 10 | Per 100 |
|------|---|----|--------|--------|---------|
| 2 to | 3 | ft | \$ .35 | \$2.50 | \$20.00 |

**R.** crenulata (4 to 6 ft.). Not as compact in growth as the others.

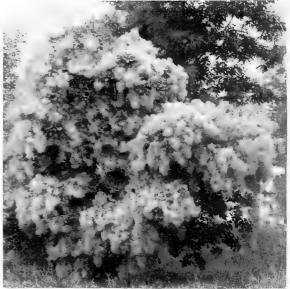

|         |    | Eacn       |
|---------|----|------------|
| 9 to 10 | ft | <br>\$1.50 |

R. Frangula. Alder Buckthorn (8 to 12 ft.). Large, dark green leaves, and in the fall bears reddish-black berries.

## Rhodotypos

Rhodotypos kerrioides (4 to 5 ft.). The foliage of the White Kerria, as it is sometimes called, is handsome and in May there is a wealth of bloom from the single white flowers. The shining black berries remain on until winter.

|             | Each   | Per 10 | Per 100 |
|-------------|--------|--------|---------|
| 18 to 24 in | \$ .25 | \$2.00 | \$18.00 |
| 2 to 3 ft   | .35    | 3.00   | 25.00   |
| 3 to 4 ft   | .50    | 3.50   | 30.00   |
| 4 to 5 ft   | .75    | 6.00   | 50.00   |

Distinct and unusual, yet highly attractive, are the blossoms of the Smoke bush.

## Shrubs Rh to Ro

## Rhus-Sumach

Rhus aromatica. Sweet-scented Sumach (4 to 6 ft.). In addition to the orange red berries, which come in June, the fall finds the foliage taking on a brilliant scarlet color.

Each Per 10 3 to 4 ft..... \$ .50 \$3.50

R. copallina. Shining Sumach (4 to 6 ft.). Almost, evergreen, the foliage of this plant is beautiful and glossy, changing to crimson in the autumn.

Each Per 10 Per 100
18 to 24 in. \$ .35 \$2.50 \$20.00
2 to 3 ft. .50 3.00 25.00
3 to 4 ft. .75 4.50 30.00

R. cotinoides (8 to 10 ft.). The greenish yellow flowers are soon followed by the feathery fruit. Beautiful fall coloring to the foliage.

Hage.

3 to 4 ft., cut back, bushy \$1.00 \$7.50 \$60.00

R. Cotinus. Smoke Tree. Mist Shrub (8 to 9 ft.). What a pretty sight the loose panicles of pale purplish flowers make, giving a smoking appearance to the plant. Foliage colors prettily in the autumn.

## Ribes—Flowering Currants

Ribes aureum. Yellow flowering Currant (4 to 6 ft.). Plant this shrub if only for its sweet-scented yellow blossoms. The fruit, which comes later, is black and edible.

R. fasciculatum Chinensis (3 to 4 ft.). Bushy growing currant, the berries persisting until as late as Christmas.

R. Utah Yellow (4 to 5 ft.). Largest berried of all the currants, which are of a yellowish color.

2 to 3 **ft**..... Each Per 10 \$ .35 \$3.00

#### Rosa—The Roses

The glorious roses are a source of interest to all flower lovers and a necessity to every well-schemed garden.

In offering our collection we do not claim to have a complete list by any means, confining those we grow to the most vigorous, tested

The grand wild roses form a group that

should receive the attention of all striving for artistic landscape effects, having possibilities that the hybrids do not possess.

In growing the climbing and bushy roses we frequently pot the plants, facilitating trans-

planting.

To gain the best results, planting should be attended to in the spring unless the plants are pot-grown, as many are we offer. These are unusually strong and moved this fall will repay with a wealth of bloom next season.

R. canina. Dog Rose (4 to 6 ft.). Single pink flowers in June. Excellent for wild plantings.

Each Per 10 8 .35 83.00

R. Carolina (6 to 7 ft.). This is a splendid rose for massing, its clusters of pink roses being unusually pretty.

R. White Rambler. White flowers, sometimes

Each Per 10 Per 100 2 to 3 ft., 5 in. pots...... \$ .50 \$3.50 \$25.00

R. Wichuraiana. Memorial Rose. A grand rose for running over banks and rocks. The glorious, shiny green foliage and abundance of pure white, fragrant flowers make this a general favorite.

Each Per 10 Per 100 2 to 3 ft., 5 in. pots..... \$ .50 \$3.50 \$25.00

#### Wichuraiana Hybrid Running Roses

What a charming class of roses! Useful for climbing or trailing and so distinct from all other forms.

The rich, glossy green foliage is beautiful in itself, and flowers, in single and double forms, fragrant and obtainable in any shade or color, give the final touch of beauty to them.

For covering rocky places, banks, fences, walls or running on trellises, they are admirably suited.

The assortment we have is large and varied, each variety having its distinctive merits.

The pot-grown plants may advantageously be planted in the fall. The field-grown plants should be moved in the spring.

R. Wichuraiana Alberic Barbier. Double creamy white rose. The large glossy green foliage is almost evergreen.

Each Per 10 Per 100 2 to 3 ft., 5 in. pots..... \$ .50 \$ .50 \$ .50

R. var. Dorothy Perkins. One of the grandest roses yet produced. The double, clear pink roses come in clusters in great profusion and make a wonderful display. Glorious foliage.

Each Per 10 Per 100 2 to 3 ft., 5 in. pots..... \$ .50 \$3.50 \$25.00

R. var. Edwin Lonsdale. Lemon white, double rose. Delicate fragrance.

6 to 12 in., 4 in. pots...... \$ .35

R. var. Evergreen Gem. A fine, double white rose and the foliage is beautiful and glossy.

Each Per 10 Per 109

3 ft., 5 in. pots....... \$ .50 \$3.50 \$25.00

R. var. Gardenia. This rose opens yellow, but changes to a pure white, double flower. It is a grand form and has good foliage.

Each Per 10 Per 100 18 to 24 in., 5 in. pots... \$ .50 \$3.50 \$25.00

R. var. Jersey Beauty. The best single rose, flowers very large and buff in color. Elegant foliage.

Each Per 10 Per 100 5 in. pots ...... \$ .50 \$3.50 \$25.00

R. var. Pink Roamer. A fragrant and desirable single pink, smaller than the former in size.

Each Per 10 Per 100 3 to 4 ft., 5 in. pots..... \$ .50 \$3.50 \$25.00

## Ro to Ru

Rosa—Continued

R. var. Rene Andre. Single carmine, centre mottled with white. Glossy green foliage.

Each Per 10 Per 100 2 to 3 ft., 5 in. pots...... \$ .50 \$3.50 \$25.00

R. var. Robert Craig. Yellow shaded apricot. Fine evergreen foliage.

R. var. South Orange Perfection. Old, well known, double pink form, changing later to white. A profuse bloomer.

Each Per 10 Per100 2 to 3 ft., 5 in. pots..... \$ .50 \$3.50 \$25.00

#### **Bush Roses**

R. Baby Rambler. This new, dwarf rose is unquestionably a beauty. When it starts in to bloom it continues all season, the red flowers similar to the well known Crimson Rambler. Excellent for bedding.

R. Clothilde Soupert. Beautiful, silvery rose flowers in great profusion, continually all summer

Each Per 10 Per 100 18 to 24 in., 5 in. pots.... \$ .50 \$4.50 \$40.00

R. Gruss an Teplitz. A grand, deep scarlet tea rose. Foliage has a purplish blush. In flower all summer.

Each Per 10 Per 100 18 to 24 in., 5 in. pots.... \$ .50 \$4.50 \$40.00

R. Kaiserin Augusta Victoria. The well known creamy-white tea rose, often having a lemon tint to the bud. Very desirable.

Each Per 10 Per 100 18 to 24 in., 5 in. pots.... \$ .50 \$4.50 \$40.00

R. Magna Charta. A strong growing June rose, the flowers of exquisite form, borne on strong stems. The flowers are of a deep rose color.

Each Per 10 18 to 24 in., 5 in. pots...... \$ .50 \$4.50

R. Ulrich Brunner. Cherry red roses of good form and unusually large in size. A grand June rose.

Each Per 10 Per 100 Per 100 \$4.50 \$4.50

#### Tree Roses

A Tree Rose in bloom is a sight that will make you long for the same on your own grounds. The blooms, clustered together, form a huge bouquet. In the semi-formal tree shape the possibilities for decorative use are many. In the past experiments in this country, the results have been miserably poor, due to the kind of stock used in the budding. At last we have succeeded in securing good, sturdy plants by using the hardy Rosa Rugosa as the stock plant.

R. Baby Rambler. The dwarf, bushy habit of the Baby Rambler and its strenuous blooming qualities, insure display throughout the season. Everyone knows the bright red flowers it bears, resembling the highly-prized Crimson Rambler.

3½ ft. stems, 2 yr. heads...... \$1.50 Per 10 \$12.50

R. Crimson Rambler. A most handsome effect is secured by the long pendulous sprays of this rambler when grown in tree-form.

R. Dorothy Perkins. Handsome, double pink Wichuraiana hybrid, with long pendulous sprays.

Each Per 10 3½ ft. stems, 2 yr. heads...... \$1.50 \$12.50

R. General Jacqueminot. Everyone knows this famous red rose, and it should especially be considered for use, when grown in this form.

Each Per 10 \$12.50 \$12.50

R. La France. Quite fragrant and a beautiful silvery rose in color. Well known.

3½ ft. stems, 2 yr. heads...... \$1.50 \$12.50

R. Magna Charta. Bright rose pink, large, full and fragrant. It is a very easily grown variety.

Each Per 10 3½ ft. stems, 2 yr. heads...... \$1.50 \$12.50

R. Paul Neyron. A delightfully fragrant, deep red June rose, deserving high praise. It is a rival of the American Beauty in bloom and fragrance.

3½ ft. stems, 2 yr. heads...... \$1.50 Per 10 \$12.50

R. Perle des Jardins. A very choice freeblooming white June rose. There are few good white roses and this one is fine.

81.50 Each Per 10 3½ ft. stems, 2 yr. heads...... \$1.50 \$12.50

R. Ulrich Brunner. The large, brilliant, cherry-red flower of this well known June Rose endears it to many.

3½ ft. stems, 2 yr. heads...... \$1.50 Per 10 \$12.50

## Rubus—Flowering Raspberry

Rubus odoratus (2½ to 3 ft.). The rosy purple flowers, coming in June, are of good size and very ornamental.

After the flat heads of white flowers, come these attractive berries.

# Spiræas

5.00

35.00

Per 10

\$2.00

4.00

4 to 5 ft.....

Of all the hardy shrubs probably none have as long a period of bloom as the various forms of the Spiræa.

Starting with the Bridal Wreath in the early days of May they continue to flower until autumn finds the red-flowered Anthony Waterer still in bloom.

All spring blooming forms should be pruned after flowering, but those flowering later may be winter pruned.

It would be a half planted shrubbery border which could boast of no Spiræas, they being well adapted for all landscape effects.

Spiraea argentea (5 to 6 ft.). Fine foliage and small white flowers in early spring. Each

# Syringa—The Lilacs

The glorious fragrant flowers of the lilacs, coupled with their pretty foliage, have for

years made them favorites in the shrub group.

They are well suited for planting in the background of shrubbery borders or for growing as specimens.

Pruning after the flowering is the only period it can safely be done, and then only old wood should be removed.

Syringa Emodi (villosa) (5 to 6 ft.). Large, shiny foliage. The white flowers come in loose panicles in May.

|                   | Each   | Per 10 | Per 100 |
|-------------------|--------|--------|---------|
| 18 to 24 in       | \$ .35 |        |         |

### Viburnum—The Snowballs

Our collection of snowballs is quite large. but not one species is without merits worth cataloguing.

Splendid shrubs for flowering and foliage effect, they are just as essential to the shrubbery border as any other of the well known shrubs. Beautiful effects are to be had from many by their pretty berries.

As specimens or in masses they develop

beautiful landscape effects.

Viburnum acerifolium (3 to 4 ft.). White, flat heads of flowers in late spring, followed by black berries. Pretty purple-colored autumn foliage. Excellent for massing and do well in shady places.

Each Per 10 Per 100 2 to 3 ft..... \$ .35 \$3.00 \$20.00

V. cassinoides (6 to 8 ft.). The changing colors of the flat heads of berries, which follow the white flowers, are highly ornamental.

Each Per 10 2 to 3 ft..... \$ .50

V. cotinifolium (6 to 8 ft.). In early May the corymbs of white flowers are quite showy. The berries are later very effective.

Per 100 Each Per 10 \$ .35 2 to 3 ft. ..... \$3.50 \$30.00 3 to 4 ft. ..... -5040.004 to 5 ft. ..... .755.00

V. dentatum (6 to 8 ft.). Bright green foliage, which colors prettily in the autumn. Valued for its berries. Makes a very symmetrical specimen.

Per 100 Each Per 10 \$20.00 2 to 3 ft., cut back..... \$3.00 3 to 4 ft. ..... .50 3.5022.004 to 5 ft..... .755.00

V. dilitatum (6 to 8 ft.). The scarlet berries make this a highly valuable addition to this group.

Each Per 10 12 to 18 in..... 2.50 18 to 24 in.....

V. Lantana (8 to 10 ft.). Foliage of this snowball is dark green, downy on the underside. It has attractive berries.

# Xanthoceras

Xanthoceras sorbifolia (6 to 8 ft.). Pretty white flowers, with crimson centre, coming in May. A valuable shrub.

3 to 4 ft., 7 in. pots....... \$1.00 \$7.50

### Zanthorhiza

Zanthorhiza apiifolia (2 to 3 ft.). A low growing native shrub. The small, plum-colored flowers appear in May.

Each Per 10 Per 100 18 to 24 in., bushy...... \$ .75 \$6.00 \$50.00

# Zanthoxylon-Prickly Ash

Zanthoxylon piperitum (10 to 15 ft.). Ornamental reddish-black berries.

# Shrubs for Special Purposes

Where certain effects are desired it is sometimes difficult to know just what plants are suitable.

We give here a list of shrubs valued for their attractive foliage and another which consists of shrubs that will do well in a partially shaded position.

### Shrubs with Colored or Variegated Foliage

Berberis vulgaris purpurea (Barberry). Cornus sanguinea variegata (Dogwood). Corylus Avellana purpurea (Filbert).

Hibiscus Syriacus variegatus (Althæa). Hippophae rhamnoides.

Hippophae rhamnoide Hydrangea radiata.

Kerria Japonica variegata.

Ligustrum ovalifolium tricolor (Privet).

Prunus Pissardi (Purple Plum).

Sambucus Canadensis aureus. Symphoricarpos vulgaris variegatus (Red

Snowberry).
Weigela amabilis variegata.

### Shrubs that do Well in Shaded Places

Amelanchier in variety.
Andromeda in variety.
Azalea in variety.
Ceanothus Americanus.
Cephalanthus occidentalis.
Chionanthus Virginica.
Clethra alnifolia.
Cornus in variety.
Hamamelis Virginica.
Itea Virginica.
Ligustrum vulgare.
Lindera Benzoin.
Ribes in variety.

Look at these Japanese Cedars and you will see the results of the special care and attention we give our evergreens.

# Coniferous Evergreens

Beware of evergreens that appear cheap. Their cheapness indicates their real value. To successfully grow good, vigorous evergreens requires a certain outlay in labor and skill. While young, frequent transplantings are necessary and, with many kinds, shearing, too, as it develops a compact form. The cheaply-priced plants have not been given this care and there is just

where the difference between them and ours exists.

We have not been in business for over half a century, without knowing that the best that can be raised is none too good for offering

to our customers—customers who have confidence in what we say and do.

When your order is dug, our plants are lifted from the ground with an abundance of soil around the roots. There are enough roots there to hold the soil. All this soil is wrapped together with the roots and you have all the plant.

In moving any living plant there is always an element of risk, but with our method of handling this risk is reduced to a minimum.

We have solved the perplexing question which always confronts our customers as to what and where to plant, by an arrangement with our Landscape Department to furnish plans and keys, showing proper location of groups, beds and borders of trees, shrubs, evergreens and

hardy plants.

These plans are simple in construction and can be executed by yourself or anyone of ordinary intelligence. The cost of a plan depends on the size and character of the effects de-

sired and varies from \$5.00 to \$10.00 each.

In purchasing plants in quantity we make special privilege rates as follows:

SPECIAL.—The 10 rate given below may be used on every item of an assorted order of 25 evergreens; the 100 rate on every item of an assorted order for 100 or more. Where no quantity rate is quoted the single rate is the lowest price that can be made. Five plants of any one variety and size at the 10 rate, or 25 of any one variety and size at the 100 rate.

These lists do not contain all the kinds and sizes we have. Tell us what you want, if you do not find it quoted.

The figures in parenthesis represent the approximate height of the plant at maturity.

### Abies—Fir

Abies concolor. Colorado Silver Fir (30 to 40 ft.). A beautiful and graceful evergreen with soft, silvery green foliage. Very symmetrical in form.

|   |    |                |     |           | Eacn   |
|---|----|----------------|-----|-----------|--------|
| 5 | to | $5\frac{1}{2}$ | ft. | Specimens | \$7.50 |

A. Douglasii (Pseudotsuga). Douglas Spruce (35 to 40 ft.). A very handsome tree for specimen use, the dark green foliage presenting an effective show.

| _                             | Each        | Per 10 | Per 100 |
|-------------------------------|-------------|--------|---------|

Picea—The Spruces

Developing into such beautiful and wellformed specimens, the Spruces are looked on as indispensable in ornamental landscape effects.

All are familiar with the beautiful steel blue Colorado Blue Spruce (Picea pungens) so valuable for foliage contrasts. The Norway Spruce (Picea excelsa) not only is fine for specimen planting, but valuable as a hedge plant. Though not as well known as the above, the Oriental Spruce is an unusually striking evergreen, growing into a very symmetrical tree.

growing into a very symmetrical tree. Picea Engelmanni. (20 to 25 ft.). This is a close rival of the Colorado Blue Spruce and develops into a grand tree. 3½ to 4 ft..... \$5.00 4 to 4½ ft..... ### Pinus—The Pines

The rugged growth of the Pines and their extreme hardiness render them valuable for many purposes.

Admirably suited for specimen planting, windbreaks, groups or use in connection with the Spruce or Firs.

The Austrian, Scotch, White and Himalayan make good large evergreens, while the Swiss Stone is more modest in growth and general development, though highly attractive. The low-growing Mountain Pine is valuable for certain situations.

## Retinispora—The Japanese Cedars

Where graceful, soft foliaged evergreens are desired the Japanese Cedars are particularly adaptable. With occasional shearing they develop into exceedingly bushy specimens, one reason why they are also suitable for hedging.

The form most commonly seen, having the golden foliage, is R. plumosa aurea. There is also the silvery blue Cedar, R. squarrosa, used for its attractively colored foliage.

Though more open in growth the species pisifera and its many forms are decidedly pret-

ty and equally as ornamental.

Where an evergreen is considered, these evergreens may be largely used to great advantage.

Retinispora filifera. (15 to 20 ft.). The long, drooping foliage and pretty form of this Cedar is very pleasing. Our plants are considerably above the average in vigorousness and form.

# Thuja—The Arbor-vitæs

There are a number of very attractive and highly ornamental forms of the Arbor-vitæs, In the evergreen bed, as screens or for hedging, they lend themselves admirably.

ing, they lend themselves admirably.

The common American is excellent for hedging and screening, and the same can be said of

the pyramidal form.

The bright golden variety, Geo. Peabody, is highly valuable, and Rollinson's Golden, though different in foliage, is equally as pleasing.

Thuja occidentalis. American Arbor-vitæ (15 to 20 ft.). The well-known form being highly suitable for hedging and screening.

Evergreens Th to Ts Evergreen Shrubs

What could be richer and handsomer than these grand Rhododendrous flowers and glossy leaves?

# Broad-leaved Evergreen Shrubs

In winter when the landscape is almost shorn of its beauty, the bright glossy foliage of evergreen shrubs makes a brave display and is, on this account, doubly valuable.

It is often that this period of the year is overlooked in the landscape planning of a prop-

erty, when there is possible such pleasing results as these shrubs create.

Not only do these shrubs produce cheerful effects during the winter period, but the growing season finds their glossy leaves making a display, often more pleasing than those of a deciduous character.

A deep, cool, moist sub-soil with proper drainage is the ideal soil and a shaded position is often preferable, as bright sunlight during the winter months is liable to injure the foliage of some of them.

### Andromeda

Excellena plants for edging Rhododendron or Azalea beds, doing well in a partially shaded position.

Andromeda calyculata. (3 to 4 ft.). The pretty white flowers come in May.

Each Per 10 12 to 18 in... \$ .50 \$ .50

A. floribunda. (3 to 4 ft.). Dark green, myrtle-like foliage. The pure white, waxy flowers come in small spikes and are very showy.

Each Per 10 Per 100 12 to 18 in., bushy...... \$1.50 \$12.50 \$125.00

#### Azalea

Azalea amoena. Evergreen Azalea (4 to 5 ft.). This is a grand dwarf evergreen bearing beautiful claret-colored blossoms in profu-

sion in early June. Excellent as a low hedge or for planting in a bed. Also good for edging Rhododendron beds.

|                          | Each   | Per 10 | Per 100 |

# Buxus—The Box

The neat, glossy foliage of the Box has gained for it thousands of admirers and it well deserves the distinction.

As a low edging plant the sempervirens, or well-known Box edging, is unexcelled. The pyramidal and tree form styles are particularly adapted to formal work.

The best results are secured by spring plant-

Buxus arborescens. Tree Box. (15 to 20 ft.). Well-known and very desirable, responding

Laurus— Bay Tree

> Laurus nobilis. Sweet Bay. A more decorative plant could not be secured, especially for indoor decoration in the winter. Useful for formal work in the garden in summer.

We have beautiful specimens of the standard or tree form. The plants are in pots, with stems 12 to 18 inches and good bushy tops. The pyramidal form is also attractive, the plants standing 3 ft. in plain, neat tubs.

Selected pair, either form,

We will gladly give prices on larger specimens, which we can furnish in either form.

Our standard Bay trees are in clay pots.

# Mahonia—Evergreen Barberry

Mahonia Aquifolium. (3 to 4 ft.). This beautiful shrub has very attractive foliage and as fall approaches, colors beautifully. It retains its foliage in perfect condition in the north, when in sheltered positions.

Each Per 10 9 to 12 in..... \$ .50 \$4.50

M. Japonica.. Japanese Mahonia (4 to 6 ft.). The leaves of this species are very large and of a bright green and remain in perfection throughout the winter. Its large clusters of yellow flowers are displayed in early spring followed by black berries.

Each Per 10 \$ .50 \$4.50 20.00

### Rhododendrons

Winter and summer there are effects to be had from the beautiful Rhododendrons that cannot well be secured from any other class of plants.

In planting the home grounds, there will often occur offsets in building which are shady and of a northern location. Such a position the Rhododendron loves, providing care is given to properly prepare the bed.

Woodland and natural plantings may frequently be improved by these glorious plants.

English grown hybrids are recognized as the finest Rhododendrons, and we have always imported this class, ignoring the stock from other sources offered at low rates.

The varieties we offer are excellent; in fact, we have handled them for years and know them to be the hardiest there are.

The beautiful native species, maximum, is now very popular and one of the finest for massed plantings. One reason for this is that large specimens are obtainable which produce grand effects. The beautiful pink clusters of flowers in this kind come in early July, after all the hybrids have finished flowering.

Catawbiense is another native sort to be recommended for large or small plantings. The clusters of rose-colored flowers appear in spring, and when used with maximum, help to

prolong the flowering period.

It pays to get good plants, but equally important is the preparation of the bed. Spend a little time on it, and your extra care will be paid for many times over. It is permanent results you are seeking.

#### Making a Rhododendron Bed

Dig out the soil to a depth of about four feet and fill in the bottom with about two feet of broken stone or similar material. Finish with good top soil; sod is better if it can be procured. Should the soil be heavy, add a proportion of sand to lighten it. Good drainage is essential. Provide a mulch by covering the top of the ground with a liberal amount of well-rotted stable manure. Such a bed will be cool and moist all the time, imitating the conditions under which the plants thrive so wonderfully with only the care Dame Nature gives them.

### Rhododendron Catawbiense

The Japanese Kudzu vine, Dolichrs Japonica, is admirably suited for pergola effects. It is a remarkably rapid grower,

# Vines and Climbers

There is a need for vines everywhere—the porch, the wall, the pergola, on that unsightly tree trunk, and a thousand and one places, impossible to successfully treat with other plants.

In our assortment will be found both old-fashioned favorites, together with the best of the newer kinds.

Our stock is strong and vigorous and especially where we offer the plants in pots. This method of growing permits of moving at almost any period and no check occurs to the growth in the operation. Results under such conditions are immediate.

Buyers are favored with the lowest rate quoted on each item if 25 or more vines in any assortment are taken; 5 plants of any one variety and size receive the benefit or the 10 rate, and 25 at the 100 rate. Where 10 or 100 rates are not named, special prices cannot be named on those items.

### Actinidia

Actinidia arguta. Highly attractive foliage, being dark green and lustrous. In addition, there are white flowers with purple anthers, produced in clusters.

### Jasminum—Jasmine

Jasminum nudiflorum. Yellow Jasmine. Early in the spring the beautiful yellow blossoms appear, often before the snow disappears. Dark green foliage. Each Fer 10 18 to 24 in., 5 in. pots....

J. officinale. White Jasmine. A fragrant white flowered Jasmine. Not hardy north of Philadelphia without protection.

Each Per 10 Per 100 18 to 24 in., 5 in. pots.... \$ .50 \$3.50 \$30.00

# Lonicera—Honeysuckle Vines

The delicious fragrance of the Honeysuckle flowers and the pleasing forms of foliage make them general favorites, even though they are common.

Their adaptability for so many purposes and positions accounts largely for their popularity. The trellis, porch, fence, pergola, bank and many other places can be made attractive with them.

Very attractive results are obtained by planting a green and the yellow form together, especially when used on a fence in hedge-like form

Our potted plants will quickly produce results.

Lonicera Belgica. Monthly Fragrant Honeysuckle. A beautiful type bearing bright red flowers throughout the summer.

Each Per 10 Per 100 3 to 4 ft..... \$ .50 \$3.50 \$25.00

L. brachypoda. Japanese Evergreen Honeysuckle. Almost all winter the leaves remain green and glossy. Flowers creamy white and very attractive.

L. var. aurea. Renowned for its beautiful yellow and green variegated leaves. A very free bloomer, too.

L. Halleana. The well known, rapid-growing Japanese Honeysuckle. Handsome light green foliage and quantities of white fragrant blossoms

L. sempervirens. Red Coral Honeysuckle. Large, fleshy leaves, and beautiful blossoms about 2 inches long. Profuse flowering and showy.

L. Sinensis. Chinese Honeysuckle. Foliage of a reddish green color. Flower buds red, white on the inside.

Lycium-Matrimony Vine

Lycium barbarum. Produces a grand display in the fall with its scarlet berries.

Each Per 10 Per 100 3 to 4 ft...... \$ .35 \$3.00 \$25.00

L. Chinense. A neat half climbing vine. Light pink flowers are followed by highly ornamental scarlet berries in the fall.

Each Per 10 Per 100 2 to 3 ft...... \$ .25 \$2.00 \$15.00

Menispermum—Moon Seed

Menispermum Canadense. Very rapid grower and bears clusters of attractive light yellow flowers.

Each Per 10 Per 100 \$15.00

M. Dauricum. Good dark green foliage, but not as strong a grower as the above.

Each Per 10 Per 100 4 yr. ..... \$ .50 \$3.50 \$25.00 Periploca—Silk Vine

Vines

Periploca graeca. Of rapid growth. Foliage Lo to Vivery pretty and the star-shaped purple flowers quite showy.

The delicate markings and beautiful form of the variegated-leaved Grape endears it to all plant lovers.

Vitis-Grape

Vitis aestivalis. Vigorous growing wild form. Bright green leaves. Berries black.

 V. Coignetiae.
 Rich green leaves turning scarlet in the fall.

# Potted Vines are Superior

Every gardener and planter prefers a potted plant to a field grown one when it comes to vines. They can rarely be moved from the open ground without a check to the growth, resulting in a delay in securing results.

For some years back we have grown, on a large scale, quantities of vines in pots and to-day the demand is enormous.

Naturally the cost of these potted plants is greater, but consider the vigorous plants you get and the results you are sure to quickly secure. It is in this light a good investment to buy all your vines in pots.

We have gone further than vines, placing in pots and, in some cases tubs, such plants as Magnolias, Japanese Maples, Roses of all kinds, Evergreen Azaleas, and many other popular plants that have proven difficult to move from the open ground.

Regarding the success of such methods, the words of praise we receive continually from our customers convince us we are adopting the right course.

# No Perquisites Granted

An honest business policy demands that every customer be treated alike. Our aim is to be upright in all our dealings. We do not permit the giving of special advantages to any person that another could not obtain. We offer no private commissions, special rebates, rake-offs, or any other inducement in any form or under any name which is in the nature of a bribe. In fifty-one years we have succeeded in building a large, high-class business and in establishing it upon a firm foundation. We feel confident that we are able to make it grow rapidly without resorting to methods that may be in practice, yet which are far from fair. Our prices are net. They are payable without discount upon delivery of stock.

### Rare Plants

The ever-increasing love for horticulture and the deeper knowledge of its details, which are yearly becoming more general, make the following question quite a common one with us:—

"Cannot you send me a plant of a kind that every back yard or garden does not contain? I want something different. I have a good collection of plants, but wish to have a specimen or two just a trifle out of the ordinary."

Very likely we can suggest plants from our stock which will suit you exactly. It often happens that we have some treasures in our nurseries which are not listed in our general catalogue for the reason that the stock is not extensive enough to permit it. Again, they may be catalogued, but are so little known that the botanical name and description have but little significance. Tell us your desire and we will see what we can offer.

The possibilities of the hardy hydrangea, as a hedge plant, can be realized from this photograph. See how pretty the honeysuckle looks, too, trained over a fence. It's a good suggestion.

# Ornamental Hedges

Some 30 or 40 years ago the hedge was chiefly looked upon as a means of dividing property, little attention being given to its attractiveness to surroundings. Rapidity of growth and cost were the chief considerations.

At this period more thought is given to variety in form and foliage, resulting in some exceptionally pretty effects. Another noticeable improvement has been made, in that hedging is supplanting the varied, ungainly styles of iron and picket fences, giving a more harmonious effect to the property in general.

# **Evergreen Hedges**

The evergreen hedge, being attractive at all periods, summer and winter, has in this respect one advantage over the deciduous kinds.

To gain the best results with these plants they must be carefully planted in good soil. There is a tendency then to allow them to shift for themselves instead of annually mulching and enriching the surrounding soil. The lack of this attention accounts for many failures in growing these hedges.

Never attempt to grow an evergreen hedge in a shady place. It will not succeed unless, perhaps, the Hemlock Spruce, if given great care.

Prune your evergreen hedge about June, and it will encourage a strong growth during the summer. In late September a slight trimming of the growth to give the hedge form will complete the work.

The figures in parenthesis following the sizes indicate the proper distance to set the plants apart to secure the best results.

Azalea amoena. Evergreen Azalea (4 to 5 ft.). This charming plant is unquestionably grand for hedging. Pretty foliage, especially when it changes to bronze in the fall and winter. June finds the bushes completely covered with their attractive claret-colored blossoms. Not advisable to plant in the extreme north.

|                                   | Per 100 |

No Charge for Packing

Packing is free. The rule in force since 1854 has been abolished. No longer do we make a charge to cover the actual expense of packing shipments, even though the especially careful manner in which

we do this important work makes it a very costly item for us to stand.

Plants are prepared for shipment to any distance in the best manner, and we deliver them to our freight stations or express offices without charge.

This new ruling has a slight variation. When necessary to send stock in large boxes a charge is made to cover their actual cost; but even this is rebated if they are returned empty to us by freight at our expense.

# Fruit Trees, Small Fruits and Nuts

Good dependable varieties and quick results are what are wanted in fruit planting.

We offer fruit trees of a larger size than is ordinarily sold and from which you can secure quicker results. Every tree sold is personally selected, just as though you called and made the choice yourself.

Only a few varieties are listed, but they represent the very choicest of the well-known kinds.

To assist those not acquainted with the varieties, a few are mentioned. If you order, leaving selection to us, you will be well satisfied with the assortment.

#### Summer

Early Harvest. A small July apple of fine acid flavor. Straw-colored coat.

Red Astrachan. Is excellent for dessert. Deep crimson, with greenish yellow streak. Rich, juicy, slightly acid; medium sized. August.

Sweet Bough. Excellent for table use, but a little too sweet for cooking. Medium sized, pale greenish-yellow. Bears abundantly in August.

#### Autumn

Duchess of Oldenburg. Large, streaked with red and yellow. The tree is covered in October with fruit. Good for the table.

Fall Pippin. The beauty, large size and delicious flavor, render the variety exceedingly popular. Yellow-green, brown-blush on one side; mellow. October.

**Gravenstein.** Large flat fruit with a pale waxed yellow skin spotted orange and crimson. September and October.

Maiden's Blush. Medium-sized, pale lemon-yellow apple, with a brilliant crimson cheek. Pleasant sub-acid flavor. October.

Rambo. Medium sized, yellowish white, streaked and marbled yellow and red. Rich, slightly sub-acid flavor. October.

Smokehouse. Old and popular. Medium large yellow fruit, shaded and spotted crimson, and with gray and brown spots. Yellowish flesh, juicy and with rich sub-acid flavor. September and October.

Wealthy. Medium large, with yellow and deep rich crimson shading. Juicy. Lively vinous sub-acid flavor. October and November.

#### Winter

Baldwin. One of the very best apples in cultivation. Fruit large; bright red. Juicy and rich. December to March.

The Crawford Peach is a delicious, yellow free stone.

Ben Davis. Desirable because of its productiveness and on account of the large, handsome fruit, striped red and yellow. Can be kept through the winter.

Fallawater. Enormously productive of fruit of high quality. Skin yellow green, shaded dull red. Tender, with pleasant sub-acid flavor. Winter.

Grimes Golden Pippin. Fruit medium sized, sometimes large. Golden yellow. Flesh tender, crisp and juicy. Tree vigorous and productive. Winter.

King. The large fruit, striped and blotched crimson, is of rather coarse meat, but is juicy and with a rich aromatic flavor. December to March.

Northern Spy. Handsome, with the red stripe, and rich in flavor, mildly sub-acid. Keeps until late spring, and retains the fine flavor. Winter.

Rhode Island Greening. Large greenish-yellow fruit. Crisp with rich acid flavor. November to February.

Roxbury Russet. The medium sized fruit is borne prodigiously. It is dull green, covered with brownish-yellow russet. Has a rich sub-acid flavor. Winter.

Smith's Cider. A fine market apple of medium size. Striped red with a juicy, crisp sub-acid flesh.

Yellow Bellflower. A large, handsome fruit. Skin smooth, pale lemon-yellow, with sometimes a blush. Juicy, tender and crisp, with a sprightly sub-acid flavor. Winter.

### Apples—Continued

York Imperial. Medium sized fruit, shaded red. Fruit juicy and sub-acid. Keeps well. Winter.

Stocky trees, 50c. each, \$4.50 per 10; extra-sized 75c. and \$1.00 each.

# Crab Apples

Red Siberian. Small round fruit, about an inch in diameter. Yellow, with a scarlet cheek. September and October.

**Transcendent.** Yellow, striped red. Immensely productive. September and October.

Van Wyck (Brier Sweet). Large, round, conical. Whitish, shaded light red; moderately juicy. Autumn.

Yellow Siberian. Round, golden yellow. Medium size. September.

Stocky trees, 50c. each, \$4.50 per 10; extra-sized 75c. each.

# **Apricot**

Moorpark. The old English kind. Large, almost round, with orange-red cheek. Quite juicy with a rich, high flavor.

Stocky trees, 50c. each, \$4.50 per 10.

### Cherries

#### Sweet

Black Eagle. Large, heart-shaped. Skin deep purple and flesh rich and highly flavored. Early July.

Black Tartarian. Large, heart-shaped. Quite black. Flesh dark. Fine rich flavor. Middle of June.

Coe's Transparent. Medium sized. Pale amber. Flesh melting, tender, with excellent sweet flavor. Early.

Gov. Wood. Large, light yellow, shaded and marked bright red. Juicy, rich. Seed small. Very productive. Middle of June.

Ida. Rather large. Pale whitish yellow, considerably mottled with red. Tender, juicy, rich and of the first quality. Seed small. Early June.

May Duke. Large. Dark red. Juicy, sub-acid, rich. Ripens long time in succession. Very productive. June.

Napoleon Bigarreau. Heart-shaped. Pale yellow or amber, spotted and shaded deep red. Firm flesh. Productive. Late.

Rockport. Large, bright red, shaded pale amber. Firm flesh, juicy, sweet and rich. Early June, just before May Duke.

Schmidt's Bigarreau. Large. Skin deep black and flesh dark. Tender, juicy, with fine flavor.

Windsor. Liver-colored oxheart of first quality. July.

Yellow Spanish. A very productive yellow oxheart cherry.

#### Sour

Early Richmond. One of the very finest pie cherries, retaining its fruit sometime without rotting. Very productive.

English Morello. A valuable preserving cherry.
Large, dark red, nearly black.
Stocky trees, 75c. each, \$6.00 per 10.

# Peaches

Amsden's June. White with a red cheek. Free-stone and very early. July.

Hale's Early. A good white freestone peach of medium size. August.

Troth's Early. A good red, freestone and well-known in market. Early August.

Yellow St. John. An excellent yellow freestone. Fruit of large size, sweet and juicy. July.

#### Medium

Crawford's Early. Well known as one of the finest large yellow freestone peaches. September.

Elberta. A grand yellow freestone of good size and excellent flavor. Early September.

Morris White. A canning peach, very well known. White, freestone with excellent flavor.

Mountain Rose. A general favorite. White flesh of fine grain and very juicy. Freestone. Early September.

Oldmixon. Very productive and valuable, bearing large, juicy peaches with pale flesh. Middle of September.

#### Late

Crawford's Late. A very fine late, yellow freestone peach, of good size.

Salway. Large, yellow with crimson cheek. Flesh juicy and sweet. A fine late peach.

Stump the World. Well-known as a good, late freestone peach.

Ward's Late. A most satisfactory late peach. White flesh.

# Standard Pears

#### Summer

Bartlett. The well-known, juicy summer pear. Clapp's Favorite. Very productive. A good large-sized pear, juicy, sweet and fine grained. If picked just before it becomes ripe, it is delicious.

#### Autumn

Beurre d'Anjou. Here is a good cropping pear, doing exceptionally well in Pennsylvania. Fruit large, greenish-yellow; flesh white, melting and juicy. October.

**Howell.** A light waxy yellow pear, very fine and juicy. September.

**Kieffer.** A prodigious bearer, crops often breaking the branches. Very large pear and when ripened indoors is exceptionally sweet and juicy.

**Seckel.** Everyone knows the small and very juicy pears of this favorite variety. Trees do not bear as soon as other varieties.

Sheldon. This cinnamon brown pear is certainly a fine one, being so melting and juicy.

Vermont Beauty. A highly colored, smooth skinned pear, with a fine grain, and very juicy. Commonly marketed and highly valuable. October.

Worden Seckel. An improved form of the common Seckel, the fruit being of a uniform size.

#### Winter

Lawrence. A good winter pear. Mediumsized fruit, lemon yellow and juicy, melting and sweet. A heavy bearer.

Stocky trees. 75c. each, \$6.00 per 10; extra-sized \$1.00 and \$1.50 each.

### **Dwarf Pears**

Where space is limited this form is highly valuable and produces a good quantity of first-class fruit.

Beurre d'Anjou Kieffer
Clapp's Favorite Lawrence
Duchess d'Angouleme Seckel
Dwarf trees, 50c. each, \$4.50 per 10.

# European Plums

**German Prune.** Medium size; blue, juicy, rich, fine. Tree vigorous and very productive. September.

Lombard. Medium size; violet-red; flesh yellow and juicy. A strong grower and bears well. September.

Reine Claude. Large size, and of fine flavor; green. Hangs long on tree. Middle to end of September.

The Abundance Plum is one of the finest. The flesh is melting tender and highly perfumed.

# Japanese Plums

The Japanese Plums are of comparatively recent introduction, but they have been found very successful and are now being largely planted. They are extremely productive, are of ex-

cellent quality, and the trees are very hardy and vigorous.

Abundance. Very large; lemon-yellow, nearly overspread with bright-cherry; flesh orange-yellow, melting, rich and highly perfumed. August.

Burbank. Fruit large; color cherry-red; flesh deep-yellow; very sweet. Tree a vigorous grower. Last of August.

Wickson. One of the best of the Japanese Plums. It is a sturdy, upright grower, productive; fruit handsome, deep maroon-red; flesh fine; will keep two weeks after it is ripe. Stocky trees, 75c. each, \$6.00 per 10.

# Quince

Orange. This can be depended on as the most reliable Quince. Fruit of large size and yellow.

Stocky trees, 50c. each, \$4.50 per 10.

# **Bush Fruits**

# Blackberries

Erie. Enormously productive. Good, large, firm berries.

Kittatinny. Ripens early and fruits for some time. Very popular sort.

Wilson's Early. A hardy and productive variety. Fruit large, black and sweet. 75c. per 10, \$5.00 per 100.

## Currants

Black Naples. A good, dependable black.

Cherry, Red. A remarkably heavy bearer. Good berry.

Fay's Prolific. This red has been known for years as a dependable variety.

Versailles, Red. A very good currrant and a heavy bearer.

White Grape. Unusual and the best white. \$1.00 per 10, \$10.00 per 100.

## Gooseberries

**Columbus.** Very large and quite sweet. Approaches the old English varieties in size.

Each Per 10 Per 100 .25 \$2.00 \$15.00

**Downing.** A very fine green gooseberry and bears heavily.

Each Per 10 Per 100 .25 \$1.50 \$12.00

Industry. A dark red variety, rich and agreeable in flavor.

Each Per 10 Per 100 .25 \$2.00 \$15.00

Red Jacket. Considered to be almost equal in size to the famous English Gooseberries. Very fine.

Each Per 10 Per 100 .25 \$2.00 \$15.00

### Grapes Black

Campbell's Early. One of the largest fruiting Grapes and extremely satisfactory.

#### Grapes—Continued

Concord. The well-known black grape. Can always be depended on to fruit heavily.

Moore's Early. A little earlier than Concord and fruit a little larger.

Worden. Bunch large and compact. Good large berries and an early fruiting variety.

### Red and Purple

**Catawba.** A very nice berry, having an unusually sweet and aromatic flesh.

**Delaware.** The well-known small, very sweet red grape. Comes in small bunches.

Salem. Berries larger than Catawba, flesh tender, juicy and sweet.

#### White

Green Mountain. A particularly fine white grape and not well known as yet.

Niagara. This well-known white grape needs no description. It should be in every collection.

25c. each, \$2.00 per 10, \$15.00 per 100.

Campbell's Early and Green Mountain 35c. each, \$3.00 per 10, \$20.00 per 100.

## Raspberries

Columbian. Excellent flavored fruit of large size. A good dark red variety.

Cuthbert. Hardy, sweet and productive. Deep crimson.

Golden Queen. Large, firm berry, amber color, and of good quality.

Gregg. A well-known black cap. Fruit large and of good quality.

75c. per 10, \$5.00 per 100.

Carya alba. Shellbark Hickory.

Barr's Mammoth.

\$1.25 per 100, \$8.00 per 1000.

### Rhubarb

25c. each, \$2.00 per 10, \$15.00 per 100.

# Some Real Bargains

Do you require some particular plants in quantity? Can you use some we might offer, in quantities of 25 of one kind?

A portion of our nursery must be cleared and we would much rather dispose of the

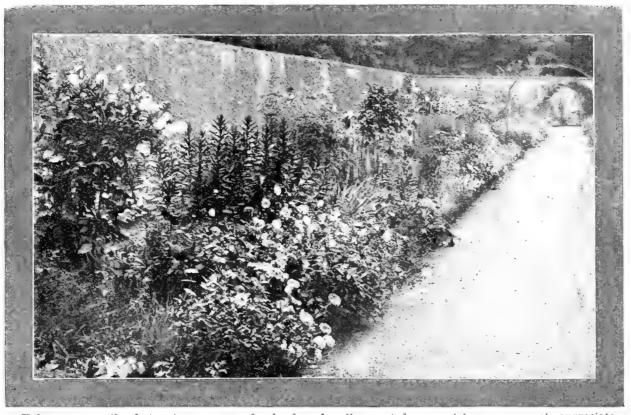

plants now on it, than transplant to another section of our grounds.

Each

Per 10

If you are in a position to use these plants in quantity we will be glad to quote you on this list or advise you as to whether we have, on this ground, such plants as you particularly desire.

Unless you are the fortunate possessor of a border of well assorted perennials, you cannot appreciate the great amount of pleasure to be had from one. A ready bouquet at all times.

### Herbaceous Perennials Hardy

Old-fashioned Garden Flowers of all Kinds, Rock Plants, Bulbs, Grasses, Ferns, etc.

The hardy perennials are indispensable. It is impossible at this day, to plan a garden and ignore these grand flowers.

Many we are familiar with, from our childhood association with grandmother's garden; and, in planting our own and using these same kinds they have a double value.

The possibilities of these plants in garden work are innumerable.

In planting the formal garden; the perennial border; edging and brightening the shrubbery border; making cheerful the border along the walk and many other situations too numerous to mention, these plants are the very best for the purpose.

By careful selection, flowers may be had at all periods through the spring, summer and late into autumn.

They are so easy to grow, and with no knowledge of them at all, a great deal of pleasure

may be had by making up an informal border.

Where there is a desire to have a border composed of the best and laid out in somewhat formal style our Landscape Department has offered to furnish plans, showing what to plant and where to plant it. These plans are simple and easy to follow, even by a beginner. They can be had from \$5.00 to \$10.00 each, or should the property require a special one it can be furnished at a very slight increase in cost.

**PRICES** 

| Single plants of any variety  | \$0.25 | One hundred plants in any assortment\$15.00 |
|-------------------------------|--------|---|
| Ten plants in any assortment  | 2.00   | One hundred plants, our selection 10.00     |
| Ten plants of any one variety | 1.50   | Five plants are sold at the ten price and   |
|                               |        | twenty-five plants at the hundred rate.     |

Write for prices on special selections in large quantities. The only exceptions we make to these prices are Paeonies and Hardy Grasses. When plants are usually sold at lower price, owing to their being naturally small as individual plants.

such as Lily-of-the-Valley Pips, Erianthus hyemalis, Hyacinthus candicans and Lilium superbum, we do not count singly but send out clumps to the value of our quotations, as no one wishes to plant such kinds singly. Special rates quoted on lots of one thousand or more. Plants suitable for Rockeries marked \*. Plants suitable for Shady Places marked §

Plants suitable for planting in Swampy Ground, marked †. Exceptionally fine plants for cutting marked:

These lists do not contain all the kinds we have. Tell us what you want, if you do not find it quoted.

# Perennials Ac to Ar

#### Achillea—Yarrow

Achilleas are thrifty growing plants. "The Pearl" is an excellent flower for cutting and A. tomentosa for planting on rockeries where the ground is rather dry.

| the ground is rather dry.   |               |              |           |  |  |  |  |

The beautiful, dainty white flowers of Achillea "The Pearl," Grand for cutting. Blooms all summer.

### Ajuga-Bugle

These pretty little semi-creeping plants are fine for bordering or to use as a cover plant. A. reptans grows more rapidly than the others.

\* Ajuga genevensis. Bugle.  $\frac{1}{2}$ Blue reptans. Bugle ...... ¼ Blue

#### Alyssum

Everyone knows the annual sweet Alyssum; the following perennial kinds are closely related, very showy and fall flowering.

\* Alyssum argenteum .... 1 \* saxatile compactum ... ¾ Yellow Yellow

#### Amsonia

Very neat growing plants, of ornamental appearance.

Amsonia salicifolia ..... 2 tabernaemontana ..... 2 Blue Cl. Blue

Anchusa 6-9 Anchusa Italica ..... 4 Blue

#### Anemone—Windflowers

There are no flowers superior to the Anemones for cutting. The Japanese kinds are especially valuable for this purpose, as they bloom late in the fall, when flowers are getting scarce. Plant in spring.

In fall the Anemones make a grand display. September 16th.

### Dictamnus-Gas Plant

A well grown clump of this plant makes a grand sight.

Dictamnus fraxinella ... 1-2 Red 5-7 var. alba ...... 1-2 White 5-7

### Digitalis—Foxgloves

Partial to a cool somewhat shaded position. One of the old garden favorites.

| ‡§Digitalis grandiflorus          |     |        |      |
|-----------------------------------|-----|--------|------|
| ‡§ purpurea. Common Fox-<br>glove | 2—3 | Purple | 6- 7 |
| ‡ var. alba                       |     | White  | 6-7  |

### Doronicum-Leopard's Bane

A yellow, daisy-like flower that is always appreciated.

‡ Doronicum plantagineum excelsum ....... 1½—2 Yellow 4—6

#### Echinacea—Cone Flower

The individual flowers last for weeks. Echinacea purpurea ..... 2—3 Purple 7—10

Echinops—Globe Thistle

Rather striking plants for a position where something large and showy is wanted.

Echinops stricta ....... 2-3 Blue 7-10

Epimedium-Barrenwort

Very dainty and interesting plants, suitable for rockeries and edges of shrubberies.

Epimedium alpinum .... ½-1 Pink 4-5 niveum ..... ½-1 Pure wh. 4-5 Musschianum .... ½-1 Rosy red 4-5

The Doronicum has highly attractive yellow flowers. May 16th.

Eryngium-Sea Holly

Very bizarre looking plants with metallic-looking foliage. Very hardy.

There is a stone wall here, but the ferns have grown so luxuriantly at its base and the Dorothy Perkins rose clambored over it, that it is lost.

## Hardy Ferns

Well may the ferns be considered, in all garden plans, filling as they do a position that no other plants could occupy as well.

What grand effects are obtained by planting them along the base of walls, in shady nooks and corners or interspersed with Rhododendrons and other shade-loving plants.

A moist situation is also a home where they do well; in fact, their native haunt.

Not only do the ferns make pleasing effects in the summer, but many, of evergreen nature, afford a pretty landscape effect in winter.

Those marked with an (E) are evergreen or nearly so.

### **Pæonies**

## The Glorious Pæonies

Well may the Paeony be considered a rival of the rose.

How truly beautiful is the gorgeous bloom of the Pæony! Delicately fragrant, immense in size and with such exquisite shades of coloring, it rivals even the world-famed rose.

In gardens large or small the pæony has a thousand effective uses. Grown as a specimen clump, planted among the shrubs, in solid beds and clumps or in a thousand other places, it gives an effect not obtainable with other flow-

Be sure to plant yours in the autumn. It is the very best period and you will have your reward next spring.

Give them an open sunny position where the soil is deep and rich and you will be rewarded with a wealth of glorious flowers.

We are proud of our wonderful collection. It contains all good tested varieties we have collected for years, together with the famous stock of the Pæony Specialist, Terry, which we bought.

A finer collection of the best, dependable varieties cannot be had. You are also assured of good blooming qualities, as our plants flowered freely last spring.

To show the popularity of our choice Pæonies we may mention that in two months last fall we sold 4986 named Pæonies.

The roots will run from three to five eyes or shoots,—the very finest size for planting. Compare our prices with those of other firms and you will see they are reasonable, ignor-

ing the fact that the quality of ours is far above the ordinary nursery grown plant.
"T." in front of a variety indicates one of Terry's pæonies. The others are from our large collection. If you want especially large clumps we can quote you on them.

#### Group A

Among these may be found some particularly fine, as well as old-fashioned, kinds.

25 cents each, \$2.25 per 10, \$10.00 per 50.

T. Anna Swanson. Beautiful deep rose; very fine.

Andre Lauris. A fine late flowering, dark rose; very double.

- T. Carnation. Light crimson, outer petals broad, inside finely fringed; late bloomer.
- T. Defiance. Bright crimson, conspicuous golden stamens. A fine late single variety.
- T. Dr. Lindley. Large flower, tall, dark crimson; a good variety.
  - Rose Fragrans. Dark purplish crimson or rose, fragrant; blooms late.
  - Grandiflora rubra. Magnificent large blood red flowers,
  - Esperance. Vivid rose-colored flower, high full centre. Free flowering, very L'Esperance. fragrant and vigorous.
  - May, Outside petals deep rose, centre petals finely fringed and tipped with silvery pink.
- T. Mrs. Fletcher. Deep dark rose, fine, blooms early.
- T. Maud Smith. Light crimson, full double, very good.
- T. Mars. Dark purplish crimson.

- T. Mabel. Crimson pink, edged white; single, early.
- T. Mrs. Key. Purplish crimson, golden yellow stamens, single, early.
  - Papaveriflora. Clear bright rose, centre fringed; early.
  - Plenissima rosea. Large flower, full double, bright rose.
  - Queen Victoria. Creamy white.
  - Rubra Triumphans. Rich glowing crimson. Sadie Walker. Large flower, bright rose, centre fringed.
  - Victoria Modesta. Tall purplish rose, centre straw colored, fringed.

#### Group B

Every kind offered here is most reasonably priced. You can verify this by comparing them with other market prices. Remember the quality you get, too. 50 cents each.

- T. Alice. Bright clear rose, changing to white, centre tinged straw.
  - Duchess of Orleans. White, tinged with purplish rose.
- T. E. Hemming. Delicate rose, changing to white, large and very double.
  - Festiva Maxima. This is considered by experts one of the finest Pæonies in existence. Strong robust grower, very large flower, pure white flecked with crimson.
  - Golden Harvest. Fine creamy yellow with blush guard petals.

A letter showing that distance is no obstacle in satisfactorily serving our many customers.

Great Falls, Montana.

Thomas Meehan & Sons, Inc.

#### Gentlemen:

I was appointed last spring, by the Governor, a member of the Park Commission, and I can certainly assure that Board that, of all the houses with whom I have dealt, my experience with yours has been by far the most satisfactory.

O. F. W., Jr.

When a man takes a photograph and pens a special letter, as this man did, it is pretty conclusive evidence that he is well pleased.

# Bargain Shrub Offer—\$10.00

Twenty-seven large, bushy and well-rooted shrubs, in good assortment, the total catalogued price being \$18.50, offered in this special collection for \$10.00.

We are compelled to clear a small portion of our nurseries. This necessity, combined with the fact that some shrubs are getting to such a size, that a year or two will find them too large for moving, accounts for this exceptional offer.

We never offered a greater bargain. And you need not, for an instant, imagine they are

common-place plants.

Every shrub offered is at least 3 feet tall, the majority being from 4 to 6 feet high. They are all well developed and highly suitable for immediate effects. Excellent for screens, shrubbery borders, or as individual specimens.

One customer from Columbus, Ohio, says, concerning one shrub collection we sent him:

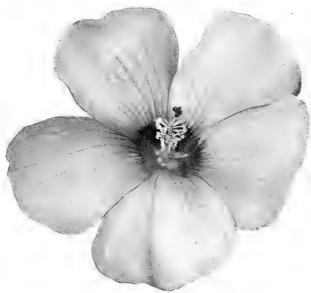

"The 25 large shrubs received from you recently were so good and came in such good order that I have concluded to send you order for 50 additional, and enclose herewith check for \$20.00."

Examine the list, which shows size and regular catalogue rate and you can see for yourself what a good bargain it is.

Meehans' Mallow Marvels

## Our Famous Mallow Marvels

An idea of the exquisite form of Meehans' Mallow Marvels can be had from this single bloom.

Yes, our Mallow Marvels are truly famous, and in the short time they have been on the market (since last March) have been sent from ocean to ocean.

Many orders we received were for lots of 10 and 25, the sterling qualities of the plants being at once recognized.

The production of these wonderful perennials reads like a story.

Thirty years ago, the founder of our nurseries, Thomas Meehan, predicted that if a cross could be made between our native mallow and the tropical Hibiscus, that would combine the hardiness of the one with the gorgeous blooms of the other, the result would be the most attractive herbaceous perennial in cultivation.

Numerous experiments were made, but without success, until finally, in 1903, one plant was discovered among a batch of seedlings which combined the desired qualities of the mammoth size, brilliant flowers and attractive foliage of the hot-house Hibiscus with the hardiness of the native mallow. And it was a much stronger grower and more sturdy than either parent.

The result is a triumph of scientific plant breeding and is pronounced by one of the Waterer firm (perhaps the most famous horticulturists in England) to be the most notable achievement for many decades. And so says every expert who has seen Meehans' Mallow Marvels in bloom.

The seeds of the original plant, which has stood in our nurseries entirely without winter protection for four years, were carefully planted, and four colors—richest crimson, fiery red, glorious clear pink and satiny white—were selected for perpetuation.

### Description of the New Creation

Meehans' Mallow Marvel is a herbaceous perennial that throws up numerous stalks 7 to

9 feet high, and so sturdy that they need no support. The foliage is most attractive, so that the plant is very decorative even when not in bloom; but when the flowers appear, from July until September, the effect is really dazzling.

Imagine a sturdy bush 8 feet high emblazoned with the most gorgeous blooms 8 inches in diameter—some reaching 10 inches and over—the crimson deeper and richer than any rose, the red more brilliant than the oriental poppy, the pink as clear and soft as a pæony blossom, and the white as satiny as a bride's gown.

In a nutshell, this new race of hardy perennials is the most marvelous out-door plant that has so far rewarded the skill of the hybridizer.

As a single specimen it will, when in bloom, overshadow every other plant or shrub on the lawn.

In round or oval beds, it will be far more decorative in foliage and flower than cannas.

In masses in the shrubbery, it will, when in bloom, dominate everything on the grounds. Those who see them at our nurseries for the first time say the mass of brilliant color almost "takes their breath away."

most "takes their breath away."

Meehans' Mallow Marvels are not particular about soil or location. Of course, the better treatment they receive in the way of manuring and water at time of blooming, the larger the stalks will grow and the bigger the flowers. They have no insect enemies and are free from disease. Although perfectly hardy, like all perennials, they will be thriftier if mulched with manure during the winter.

To insure securing the color and size you desire we would recommend your ordering early, as we completely sold out of certain kinds last spring.

#### One-Year-Old Roots

If given good soil will grow from five to eight feet high, have two to five stems and flower next season.

|                | Each.  | Per 10. |
|----------------|--------|---------|
| Crimson Marvel | \$1.00 | \$9.00  |
| Red Marvel     | .75    | 6.00    |
| Pink Marvel    | .50    | 4.00    |

#### Two-Year-Old Roots

Extra strong roots, which, planted in good soil, will form bushes four to five feet in diameter and positively flower abundantly next season.

|                | Each.  | Per 10. |
|----------------|--------|---------|
| Red Marvel     | \$2.00 | \$15.00 |

| Pink Marvel    | 1.50   | 10.00   |

Quotations on larger sizes furnished on application.

#### A Park Superintendent's Impression of Our Mallow Marvels

A noted Superintendent of Parks, in California, recently attending the Florists' Convention, visited our nurseries. He was amazed at seeing our large field of Mallow Marvels. After viewing them he said:

Iris

"If these wonderful Mallows were the only plants I had seen East, I would feel that I had been amply repaid for my trip."

An expression of this kind from such a well-posted man, means something.

"Silver King" may almost be called a white flag, though a faint blue tint can be seen.

It is deliciously fragrant.

### Popular Garden Flags

With little care and planted in any ordinary position, the beautiful German Iris or Flags bring great pleasure to anyone interested in flowers.

There are numerous positions where most effective results with them are possible. In the perennial garden or border, interspersed with shrubs, in moist situations, fringing ponds and marshes, and other places of equal importance.

The varieties we have are not common, but rather the pick of the best known kinds.

Be sure to include Silver King in your list. 25 cents each. \$2.00 per 10. \$3.75 per 25.

Alexander Von Humboldt. Light blue.

Canary Bird. Standards lemon yellow. Falls canary yellow, lightly veined.

Coelestine. A beautiful lavender-colored variety.

Evelyn. Dwarf. Standards lemon yellow. Falls orange yellow.

Jewell. Dwarf. Dark purple.

**Josephine.** One of the very best of the purple-colored ones.

Lady Stumpp. Standards lavender. Falls dark blue.

La Tendre. Standards buff. Falls purple.

Lady Alice. Standards lavender. Falls purple.

Lady Frances. A delicate lavender.

Lilaceous. Lilac and blue.

Mad. Chereau. White ground, edged and veined lavender.

Orange Gem. Dwarf. Orange yellow.

**Penelope.** Dwarf. Standards blue. Falls darker.

Rosamond. Standards lavender buff. Falls pinkish purple.

Silver King. White with lavender tinge, very fragrant, one of the best of the Germanica section of Iris.

Yolande. Standards blue. Falls velvety purple.

The Japanese Iris flowers are enormous and are unusually handsome in color and markings.

### Large-flowered Japanese Iris

In early July, after all the German varieties of Flags have ceased flowering, the immense flowers of the Japanese Iris begin to appear.

What exquisite flowers these Flags are, commonly measuring 6 and 7 inches in diameter.

They thrive in a somewhat damp or moist position, being well suited for bordering a lake or brook.

We have a most excellent collection, purchased in Japan, and coming to us with names that are too long to bear cataloguing. We have them all in separate and distinct colors and can satisfy your wishes in any desired color.

We had a profusion of flowers from these strong plants this season.

Fall is the time to plant to get excellent results.

25 cents each, \$2.00 per 10, 25 for \$3.75.

### Phlox and Bulbs

### Hardy Garden Phlox

Every hardy garden or border needs a generous planting of the beautiful hardy Phlox to relieve the dullness during July and August.

There are a host of beautiful varieties and as they do well in almost any situation, many beautiful effects are possible.

Every variety we offer has its individual merits and you'll find no objectionable magentas among them.

As they bloomed profusely this season you are assured of good results next year, if you plant this autumn.

25 cents each, \$2.00 per 10, 25 for \$3.75.

Aurora Borealis. Orange red, purple centre. Brilliant. Salmon scarlet, crimson eye.

Carran de Ache. Rosy carmine.

Coquelicot. Fine pure scarlet, with deep carmine eye.

Champs Elysees. Rich purple crimson. Dominican. Bright carmine rose.
Elizabeth. Deep pink, crimson eye.
Epopee. Violet, bright piny centre.
Eugene Danzanvilliers. Lilac, shading white.

One of the most distinct, very pleasing.

Gen. Chanzy. Salmon scarlet. Independence. Large, pure white.

J. H. Slocum. Fiery crimson, dark eye. Very bright.

La Vogue. Beautiful combination of rosy pink and lavender.

The middle of summer finds the hardy Phlox in its glory. We have a grand collection.

L'Esperance. Bright lilac, beautifully shaded. L'Evenement. Salmon pink.

Mad. B. Langier. Bright red, vermilion centre.

Moliere. Salmon, tinted rose. Prof. Schlieman. Bright lilac rose. Princess Louise. White, small pink eye. Richard Wallace. White, crimson centre. Terre Neuve. Lilac, crimson centre.

Wm. Robinson. Tall salmon pink, very bright.

### **Bulbs of First Quality**

Every bulb we handle is of extra size, sound as a rock, and from which the best results can be had

The large trumpet Narcissus Emperor. One of the

Fall is the period in which to plant bulbs to have a bright spring display, and be sure to plant them before frost prevents.

Get all the satisfaction out of your garden that is possible. Bulbs take up so little room and are of such easy culture. Long before the spring flowering shrubs show life, the bright flowers of the daffodil, tulip and hyacinth brighten the landscape.

Plant solid beds of bulbs in front of your porch, edge the walks, brighten the margin of the shrubbery and perennial borders, and, in fact, use them in all conspicuous positions on your property. They never disfigure a place.

Great pleasure can be had from bulbs by planting them in pots in early autumn, burying them for about six weeks and later bringing them slowly into the light and warmth. A grand display of bloom during the winter months results from this small amount of labor.

The figures preceding the names indicates the height of the flowers, for convenience in bedding.

#### Bulbs

### Single Hyacinths

All these named varieties can be depended upon to give excellent results. Just suited for forcing or bedding.

Single Blue...... Grand Maitre. Bright.
King of the Blues. Bright Blue..... Gertrude. Deep Pink.
Rosea Maxima. Salmon pink. Bright Blue. Single Red ...... Robert Steiger. Crimson and Compact. Roi des Belges. Bright scarlet. Single White ..... Alba Superbissima. Pure white. La Innocence. Clear white. Single Yellow..... Herman. Orange. Single Yellow ..... Herman.

75c per dozen, \$5.00 per 100, \$47.50 per 1000. By mail, add 15c per dozen for postage.

Ida. Bright yellow.

### Early Single Tulips

A choice collection covering a wide range of color. Valuable for forcing or bedding.

| Vines and How to Grow Them.—Vol. 4.         |
| (By William McCollom.) Dealing with         |
| these delightful climbing and trailing      |
| plants for the adornment of trellis, pillar |
| and wall, with suggestive directions. Il-   |
| lustrated from photographs 1.21             |
| Water Garden, The. (By Henri Hus and        |
| Henry S. Conrad.) A practical garden        |
| knowledge of the best water lilies and      |
| other aquatics by America's great au-       |
| thority on the family, with cultural de-    |
| tails; making of ponds and small gar-       |
| dens. Illustrated 1.21                      |
| Woman's Hardy Garden, A. (By Helen          |
| R. Ely.) A most interesting garden book     |
| with an appealing style about it 1.75       |
|   |

### Meehans' Peerless Grass Mixture

Get good grass seed or none at all. Do not buy until you are satisfied of the quality of the mixture you purchase.

Grass seeds are sold in every state, from the seed that has never been cleaned to a fine,

and highly screened grade.

Ordinary grass seed will not bear examination, often consisting of the sweepings from the seed rooms. The price often looks tempting to the inexperienced, but the weedy looking lawn bears testimony to its cheapness in quality.

Every pound of our grass seed mixture is clean and of the highest quality. We purchase separately, the various kinds of seed that make our mixture. We know therefore what we get. Our mixture contains a certain per cent. of the best known grasses; the recipe having been prepared after years of experimenting.

When you get Peerless mixture you are assured of good results.

35 cents per lb., postpaid. \$4.75 per bushel. \$4.50 in 5-bushel lots. \$4.25 in 10-bushel lots. \$3.75 in 25-bushel lots.

Kentucky Blue Grass. We have a fancy recleaned grade that will stand the most rigid It is as clean as grass seed can be had. 1 bushel (14 lbs.).....\$3.00

Competent Gardeners Supplied

We have a large register of good, practical gardeners and horticultural superintendents, situated all over the United States. We inquire carefully into their character, and are in a position to supply competent men for all positions.

Write us if you need a good gardener, the service is free.

# Old-fashioned Hardy Gardens

### BARGAIN COLLECTIONS

### For the Lover of Old and Well-known Hardy Flowers

How we treasure those old-fashioned flowers, which were so closely identified with the home-life of our forefathers! At one time they seemed to lose their interest, but the past few years have witnessed a change and now there is a demand for them which can hardly be met.

No class of plants quite meet our needs as well as these attractive,

old-fashioned ones.

Early in the spring the Pæonies and Flags come into bloom and are closely followed by the Bellflowers, Larkspur, Phlox and a thousand and one other beautiful flowers until frost finds those old-fashioned, sweet-scented Chrysanthemums in their glory. It is possible to pick a bouquet at almost any period, and with a careful selection, there are many pleasing combinations to be had.

How valuable they are, being permanently satisfactory, as they live out from year to year. They are quite easy to plant and require very little

attention, that often prevents the raising of other plants.

If you have a position along a fence, bordering a walk or wall, or, in fact, any place where plants of an unconventional habit of growth will look well, you will find one of our hardy collections just suited.

It is not a list of surplus plants, but a well-selected collection of some of the very finest perennials, and composed of stocky plants, of a size that

will give quick and satisfactory results.

Send in your order early this fall and set out the plants so that they may get the benefit of the lovely Indian Summer weather and you will be well repaid with a wealth of bloom next year.

### Hardy Garden No. 11, \$5.00

This collection is an unusually good one and contains 56 well-selected perennials, including among the plants such kinds as Phlox, Day Lilies, Larkspur, Oriental Poppies and German and Japanese Flags. In addition, there are other kinds of special merit and if planted out, will nicely cover from 135 to 150 square feet. The selection is also made to give good returns in flowers from spring until fall.

### Hardy Garden No. 12, \$10.00

Here is a highly valuable collection which cannot be spoken too highly of. There are 130 perennials in it and in addition to those in the other collection may be mentioned Hollyhocks, Pæonies, Lilies of various kinds, and many choice and well-known perennials that cannot well be dispensed with in an old-fashioned garden.

It will easily cover 300 square feet and a good assortment of flowers can be depended on from early

spring until fall.

We spared no expense in making the immense collection of pæonies we now have growing in solid blocks in our nurseries.

Terry, the famous Pæony Specialist, sold us his collection and combining it with the large and varied stock we had, gives us a unique and valuable pæony list.

Our pæonies have gained distinction, not only for great variation in form and color, but unusual vigorousness. All our plants, set out in the fall, give good displays of flowers the following spring, and frequently spring plantings have produced bloom at that time.

Our pæonies have been carefully sorted and labelled, giving us confidence when we send them out under our description.

The popularity of the pæony has gained for it many devotees, but there are quite a few who are not posted as to what are the best and most reliable varieties.

We have a special offer to make to everyone who wants a good, pleasing selection of first-class varieties.

### Special Offer

We will sell 25 selected Pæonies in 10 good dependable varieties for \$5.00.

A request will bring a list of the varieties we would include in this collection. It is an exceptionally reasonable offer.
